Managing Green Issues:

Managing Green Issues T. Curtin, 2006-10-13 Green issues have a large impact on how an organization is seen and huge implications for the organization's success brand values and the sales decisions of consumers towards its products This thoroughly updated practical book guides the modern organization on how to channel environmental issues to gain competitive advantage

Managing Green Business Model Transformations Axel Sommer, 2012-05-20 Environmental sustainability creates both tremendous business opportunities and formidable threats to established companies across virtually all industry sectors Yet many companies tackle the issue in a superficial or passive way rather than considering fundamental changes to their existing business models By ignoring the opportunities of Green Business Model Transformations companies exclude themselves from a large variety of potential means to create economic value In addition to ordinary product and process innovations they can change the rules of the game within an industry towards environmental sustainability Green Business Model Transformations however are challenging ventures New green business models with all their uncertainties and inherent complex systemic characteristics are difficult to design assess and implement successfully particularly in the context of established companies that often entail complex structures and considerable inertia As a result there is a great need for guidance in management practice This publication addresses this need with a general approach to Managing Green Business Model Transformations that is based on a broad theoretical foundation illustrated by many real world examples from various industry sectors

Managing Green Teams John Moxen, Peter Strachan, 2017-09-20 To reach environmental excellence organizations must unlock and channel the ideas and energies of their staff This can only be achieved through the effective leadership and commitment of senior managers and the development of sound teamworking throughout the organization To this end forward looking organizations have formulated a range of teams including environmental steering committees environmental action teams process improvement teams and quality and environment circles The aims of this book are to bring together practical experiences and theoretical developments in relation to the role of teamworking within the context of environmental management Contributions from an international group of leading practitioners and academics present examples of how teamworking can be utilised to solve the complex and uncertain environmental challenges that organisations face The book is divided into three key sections The first section examines in a number of different organizational contexts the problems that confront managers during the process of forming and developing environmental teams In the second section the book examines how environmental teams can trigger changes in core operations and integrate environmental concerns in business decision making at every level in the organization In the final section the focus of the book shifts to environmental networks and their role as inter organizational co ordinators

With regard to dangers like for example climate change through carbon dioxide, the usage of toxic substances, the diminution of the Earth's ozone layer, the greenhouse effect, the destruction of natural habitats and above all the fact that we live in a world of waste, the so-called green issues or environmental issues are increasingly important and urgently need to be established in business managements. That our nature and environment will nothing but profit from it is widely known. But what are the benefits companies gain by establishing an environmental management? This paper will discuss what the benefits of environmental management in businesses are. Additionally, it will also glance at some organisations supporting this topic Corporate Strategies for Managing Environmental Risk Bernard Sinclair-Desgagné, 2004 Sinclair-Gesgagné Polytechnique France presents this collection of 33 previously published papers with the intention of demonstrating key contributions for corporate management of environmental resources and risks.
