Managing Labor Migration In The Twenty First Century:

Managing Labor Migration in the Twenty-First Century Philip Martin, Manolo Abella, Christiane Kuptsch, 2008-10-01 Why have ninety million workers around the globe left their homes for employment in other countries What can be done to ensure that international labor migration is a force for global betterment This groundbreaking book presents the most comprehensive analysis of the causes and effects of labor migration available and it recommends sensible sustainable migration policies that are fair to migrants and to the countries that open their doors to them The authors survey recent trends in international migration for employment and demonstrate that the flow of authorized and illegal workers over borders presents a formidable challenge in countries and regions throughout the world They note that not all migration is from undeveloped to developed countries and discuss the murky relations between immigration policies and politics The book concludes with specific recommendations for justly managing the world's growing migrant workforce **Managing**

Openness Mona Haddad, Ben Shepherd, 2011 The global financial crisis triggered a broad reassessment of economic integration policies in developed and developing countries worldwide The crisis induced collapse in trade was the sharpest ever since World War II affecting all countries and all product categories A huge shock to the trading system combined with severe macroeconomic instability makes it natural for policymakers to call into question the basic underlying assumptions of trade liberalization and openness In particular outward oriented or export led growth strategies are being reassessed as openness is increasingly associated with greater volatility However it is crucial not to lose sight of the dynamic benefits that openness can offer Examples include technology transfer increased competitive pressure that reduces markups and improves efficiency and economies of scale The real question is how to manage outward oriented strategies so as to maximize the benefits of openness while minimizing risks This book aims to contribute to this important and ongoing policy debate bringing together recent empirical work on the trade collapse its causes and consequences and the broader trade policy agenda in the post crisis environment It addresses critical policy issues revolving around the topic of outward oriented growth strategy including policy instruments that help manage risks associated with outward orientation lessons learned from the crisis for particular countries and regions and how emerging trade policy issues such as climate change commodities global production networking and migration affect the prospects for recovery and outward oriented growth

Imperialism in the Twenty-First Century John Smith, 2016-01-22 Provides an examination of the relationship between the core capitalist countries and the rest of the world in the age of neoliberal globalization Deploying a Marxist methodology Smith begins by tracing the production of certain iconic commodities the T shirt the cup of coffee and the iPhone and demonstrates how these generate enormous outflows of money from the countries of the Global South to transnational corporations headquartered in the core capitalist nations of the Global North From there Smith draws on his empirical findings to theorize the current shape of imperialism He argues that the core capitalist countries need no longer rely on military force and colonialism although these still occur but increasingly are able to extract profits from workers in the Global South through market mechanisms and by aggressively favoring places with lower wages the phenomenon of labor arbitrage From publisher description
