#### *Language Policy of Education and National Identity in Ethiopia* Yirgalem Alemu,2019-10-17

Academic Paper from the year 2019 in the subject Speech Science Linguistics language English abstract This work has attempted to give an overview of how the language policy of the different regimes in Ethiopia has contributed to the sense of national identity Although language is not the only factor that consolidates or weakens national identity it plays a significant role It is with this in mind that the book is written Different language related policies and documents of the imperial military and EPRDF regimes were closely investigated Sections and statements in the policy pertaining to language use were considered as units of analysis Furthermore empirical and theoretical literature written in areas of language policy and national identity were consulted The author also included his personal experiences as a university instructor and informal

meetings held with people in different walks of life The evidence obtained from the sources mentioned above reflects that the language policy used in Ethiopia is highly polarized ranging from one language to all to no language to all That is the regimes before EPRDF dictate one language to be used as a tool of communication to all Ethiopians On the other hand the EPRDF regime emphasized local language and culture without practically giving any room for national communication Both approaches contribute little to national identity formation This book recommends that Ethiopians need to learn from other multilingual countries about language planning Ethnocentric thinking that assumes one's own language as superior to the other's language should be avoided Politicians also need to abstain from politicizing language identity and using it as a means of mobilizing support This book recommends that bilingual multilingual education contributes a lot to Ethiopian national identity formation
