Manatee Kathy Darling, 1991-04-09 The plight of the gentle giant manatee is clearly presented in a photo essay In a straightforward narrative the author speaks directly to the reader as she describes the mammals and her two year experience on location with the manatees who live in the Crystal River of Florida A good solid piece of interesting and informative nonfiction that will be welcomed for its quality as well as for its subject Horn Book *Movements of*

Ecology of Manatees in Southeastern Georgia Barbara Jo Zoodsma, 1991 Tracings 99 07 Population Biology of the Florida Manatee Thomas J. O'Shea, Bruce Bennet Ackerman, Henry Franklin Percival, 1995 This is a collection of papers presented at a 1992 technical workshop on manatee population biology sponsored by the U S Fish and Wildlife Service and the Florida Department of Natural Resources Topics covered include manatee research programs techniques for studying manatee population biology and reports of completed studies The book concludes with recommendations from the workshop and a brief synopsis of pertinent work that has been published since the workshop Wild Capital Barbara K.

Jones, 2019-11-11 In *Wild Capital* Barbara Jones demonstrates that looking at nature through the lens of the marketplace is a surprisingly effective approach to protecting the environment Showing that policy makers and developers rarely associate wild places with monetary values Jones argues that nature can and should be viewed as a capital asset like any other in order for environmental preservation to be a competitive alternative to development Jones describes how the ecosystem services model a tool that connects human well being with the services nature provides can play a critical role in assigning species and their habitats measurable values She uses five highly recognizable animal species moose manatees sharks wolves and bald eagles as examples to show how highly valued charismatic fauna can serve as symbolic representations of entire ecosystems at risk Through an emphasis on branding incentives and ecotourism Jones advocates for channeling the social and economic power of these and other faces of nature to inspire greater environmental awareness and stewardship

Contending that many people don't realize how fiscally pragmatic environmental initiatives can be Jones is optimistic that by recognizing the costs of habitat destruction and diminished biodiversity we will make better choices regarding conservation and development In doing so we can more readily move toward co existence with nature and a sustainable future *Annual*
