## **Manifesto For Learning Fundamental Principles:**

**Manifesto for Learning** Janet Collins, Joe Harkin, Melanie Nind, 2002-08-27 What makes people learn effectively What can we do to promote more effective learning Innumerable researchers have studied these important and urgent questions yet their findings tend to be fragmentary and disparate Now Janet Collins Joe Harkin and Melanie Nind provide the big picture Drawing on research from all sectors of education the authors show that effective learning depends crucially on a few easily understood principles These principles hold true regardless of the age or nature of the learner or the context in which the learner is working Manifesto for Learning explains those principles and how to apply them showing in the process how to make the vision of an effective learning society a reality Coaching Psychology for Learning Qing Wang, 2018-04-20 The contribution of coaching psychology to educational fields is increasingly recognised This timely book introduces coaching psychology as a facilitative method to support learning in different educational contexts Coaching Psychology for Learning Facilitating Growth in Education is conveniently organised into three parts Part One begins with a detailed account of educational paradigms learning theories and coaching psychology theories it then reviews important studies of coaching applied to the educational field and identifies a number of gaps to which coaching psychology for learning can contribute Part Two presents two empirical participatory studies of coaching psychology for learning which draw from both doctoral research conducted in the UK and educational work in Mainland China two original and evidence based coaching models are also illustrated Part Three consolidates the empirical evidence and original coaching models by exploring the nature of educational coaching including the context purpose processes and people and their interrelations The review of learning theories and coaching psychology theories in Part One enables the reader to gain a quick understanding of coaching psychology and its role in education while the empirical studies in Part Two are particularly useful for undergraduate and postgraduate students providing practical examples of how to conduct coaching psychology research in the field of education in both the West and the East The book also offers advice on design and implementation issues which will benefit educational psychologists and coaching psychologists who wish to focus their professional practice in education Coaching Psychology for Learning is essential reading for any teacher student or practitioner who wishes to become an educational coach to facilitate learning It will appeal to coaches and coaching psychologists including those in training and at postgraduate level as well as professionals in educational settings such as school leaders counsellors and coaches and educational psychologists

Rethinking the School Curriculum John White, 2003-12-16 In 2000 the school curriculum in England was equipped for the first time in the country's history with an extensive set of aims and purposes In this book leading experts in the teaching of school subjects examine the significance of the new aims for the reform of the curriculum In two general introductory chapters John White discusses the validity of the aims and how they might be realized in schools The remainder of the book focuses on subject specific areas and how these need to be brought into line with the new aims so as to produce a more

relevant and enjoyable curriculum experience for pupils including more opportunities for choice of activities The book concludes with suggestions about how government policy on the curriculum should now succeed This portrayal of the school curriculum today and how it could be developed in line with the new aims will be of interest to those studying education with a particular focus on the areas of curriculum assessment school management philosophy of education and the history of education
