**The Lancet**, 1895 *The Professional Development of Nursing and Midwifery in Ireland* Yvonne O'Shea, 2012-11-30 *The Professional Development of Nursing and Midwifery in Ireland: Key Challenges for the Twenty First Century* provides a unique overview of the many changes that are taking place in the Irish health services and details how they will continue to affect the professions of nursing and midwifery. It explores how nurses and midwives interact with others in the health services and how nursing and midwifery are a rich resource in the delivery of an efficient and effective healthcare service. This book is a comprehensive guide to what it means to be a nurse or midwife in today's Irish health services. It is essential reading for all those involved in nursing and midwifery education, both students and educators, and is a reference book for clinical practitioners, employers and all those involved in the formulation of policies for the health services and the regulation of the professions.

**Childfree and Sterilized** Annily Campbell, 1999. This book examines the relatively new social and medical phenomenon of women in the developed countries in the world choosing to remain childless and electing for sterilization rather than continuing with other forms of contraception. 23 voluntarily childfree/sterilized women aged 22 to 51 years tell their stories, revealing struggles they faced in being women without children in a society that expects women to be mothers. They describe the many barriers encountered on the way to being sterilized, including prejudice from those around them as well as hostility and refusal from the medical profession. The women recall how their reasons and decisions were ignored or pathologized by doctors who held unquestioned assumptions about how women should be. Feminist and sociological perspectives are employed to highlight that voluntarily childfree women are perceived as abnormal, not real women, and are often the target of negative and critical comment.
