Midwifery and the Medicalization of Childbirth

Edwin R. Van Teijlingen,2004 This book provides an introduction to the sociological study of midwifery The readings have been selected to highlight the interplay between midwifery and medicine reflecting the medicalization of childbirth It highlights the major themes in both a historical and a current context as well as western and non western societies Two major themes underlie the organization of this book that the conception of midwifery must be broadened to encompass a

sociological perspective and that the ongoing trend toward the medicalization of midwifery is crucial to an understanding of the historical current and future status of midwifery By medicalization of childbirth and midwifery the author mean the increasing tendency for women to prefer a hospital delivery to a home delivery the increasing trend toward the use of technology and clinical intervention in childbirth and the determination of medical practitioners to confine the role played by midwives in pregnancy and childbirth if any to a purely subordinate one
