Migration And International Legal Norms:

Migration and International Legal Norms T. Alexander Aleinikoff, Vincent Chetail, 2003 This volume provides a comprehensive and up to date analysis of the source and scope of international law on migration. It explores international norms on state authority to regulate migration, freedom of movement, forced migration, human rights, family unification, trafficking and smuggling of migrants, national security, rescue at sea, health, development, integration and nationality. *Migration and International Legal Norms* shows that despite the absence of a comprehensive legal instrument governing international migration, there is a wide range of legal norms relevant to migration embodied in multilateral treaties and conventions, regional agreements and customary international law. It also identifies some significant gaps in international law, recommending areas for further cooperative efforts. This volume will be of interest to scholars and policy makers and to all those interested in how the community of nations is responding to the increasingly significant phenomenon of international migration. *International Legal Norms and Migration* Thomas Alexander Aleinikoff, International Organization for Migration, 2002 Offprint and the introductory chapter of a monograph to appear under the title *Migration and international legal norms* edited by T Alexander Aleinikoff and Vincent Chetail published by T M C Asser Press in early 2003.

International Legal Norms and Migration International Organization For Migration Staff, International Organization for Migration, 2003 This report reviews international law relating to migration management with chapters on state authority and responsibility, the freedom of persons to leave and return, forced migration, human rights of migrants, labour migration and development issues.

International Legal Norms and Migration Thomas Alexander Aleinikoff, 2002 [Is the International Legal Order Unraveling?](#) David L. Sloss, 2022 The book examines how the rules based international order is threatened by challenges such as climate change, autonomous weapons and cyber weapons. It discusses how the international order can confront these threats and proposes future developments of the rules based international order as a whole. Multilateralism has served as a foundation for international cooperation over the past several decades. Championed after the Second World War by the United States and Western Europe, it expanded into a broader global system of governance with the end of the Cold War. Lately, an increasing number of States appear to be disappointed with the existing multilateral arrangements both at the level of norms and that of institutions. The great powers see unilateral and bilateral strategies which maximize their political leverage rather than diluting it in multilateral fora as more effective ways for controlling the course of international affairs. The signs of the crisis have been visible for some time but recent crises indicate an acceleration of the on going disintegration of the multilateral system such as Brexit, growing resistance on the part of States to international monitoring of compliance and the radical change in the US foreign policy during the presidency of Donald Trump which saw the US withdraw from several multilateral agreements e.g. the Iran Nuclear Deal and the Paris Agreement.

Migrants and Rights Mary Crock,2017-05-15 The concept of the migrant as rights bearer at law is surprisingly recent and under developed Migrants have traditionally been seen as outsiders persons who are in society but not yet of society Migrants are at best invitees guests for whom presence in a country is a privilege This is the first of two volumes which bring

together writings which trace the evolution in thinking about migrants as legal subjects and rights holders. The articles cover issues around state sovereignty and migrants as subjects of international law the articulation of rights different categories of migrants issues around health and disability. IOM This book encapsulates the law of international migration by examining developments first addressed in the volume on Migration and International Legal Norms edited by T A Aleinikoff and V Chetail T M C Asser Press 2003 and by discussing wholly new themes. In this regard the book considers emerging issues such as the challenges posed by migration to State sovereignty and the protection of human rights as a result of the increasing tensions between anti terrorism or security legislation and immigration measures the impact of the use of biometrics technology e g fingerprinting to identify and better monitor international movements of persons and enhanced cooperation on the European Union external border. The human rights of vulnerable groups of migrants such as migrant workers women victims of trafficking and stateless persons are also examined. The issue of forced migration warrants a consideration of the international migration law relating to groups such as internally displaced persons as well as the international community's response to secondary movements of asylum seekers. Questions of state responsibility concerning for example stranded migrants and provision of consular protection and assistance to migrants are also discussed. Moreover the expansion of regional legal frameworks concerned with migration such as EU immigration and asylum law and policy and the growing case law on European citizenship as well as developments in free movement regimes in Africa the Americas and the Caribbean are added to the analysis of the growing body of international migration law. A range of persons from international organizations legal practice and academia with expertise in International Migration Law have contributed to this volume which is aimed at a broad audience including policy makers academics researchers postgraduate students legal practitioners civil society representatives and journalists. shortcomings of the current international legal system and customary international norms that govern international aviation law to comply with contemporary air transport market realities As the air transport market develops globally the safety regime of civil aviation should also be governed and applied globally In this book the author departs from current international legal norms to examine the emerging legal field of global administrative law Through that lens the possibility of reconstructing the set of legal mechanisms that govern domestic and international administrative interaction in the global field of aviation safety is explored This book demonstrates that a legal system is never complete but always develops in tandem with changing needs i e the participation of the affected parties Exploring the principles of GAL theory contributes to addressing the contemporary legal issues relating to state compliance with international aviation safety standards that would otherwise not be covered by customary international law In particular the principles of GAL theory regarding global governance and the public character of global regulations the role of individuals and states in global governance and state sovereignty are considered valuable contributions to contemporary global aviation safety issues in practice It is asserted in this book that proper checks and balances in global aviation safety can be improved by making these accessible to individuals by way of national courts Finally establishing public awareness of global aviation safety standards will eventually create greater pressure on states to implement and enforce them This book is in an area increasing academic and research interest of practitioners of public international aviation law global administrative law global governance and global aviation safety global air transport market regulations Journal of World Trade Law ,2010-08
