**Migration Into Rural Areas** Paul Boyle, Keith Halfacree, 1998-06-29 The idea of escaping to the countryside has caused change in the population structures of western society This book reviews the theoretical concept of counterurbanization and through case study research explores the demographic social cultural and spatial aspects of people who move into rural areas This is a summary of state of the art research in this field of population geography *Population and Community in Rural America* Lorraine Garkovich, 1989-10-24 The American experience has been one of constant and accelerating change Against this background American cities have exerted a magnetic pull attracting streams of migration from rural to urban areas transforming a predominantly rural society into one in which 75 percent of the people live in urban areas *Population and Community in Rural America* focuses on migration as the primary force for population change in rural America Within smaller more dispersed rural populations any changes in the number of births or deaths or movement in or out of the area impact community and family structures In the last half century migration studies have been the single largest area of rural population research because the consequences of migration on both community population and socioeconomic structure are usually much greater than shifts in mortality and fertility Garkovich argues that migration streams exert a cohesive force binding American communities together and that such in out migrations have contributed to a national character based on intermingled rural and urban perspectives She presents a thorough investigation of the nature of migration and its effect on other population processes and characteristics and explains why particular patterns of migration and population change have occurred at certain points in the historical development of rural America The first two chapters describe various theoretical and methodological issues review major social economic and political events of the three historical eras of rural population change and consider the social environment within which the changes occurred Chapters three through six detail rural population changes including major migration streams and the factors and outcomes associated with or attributable to these movements Chapter seven analyses institutional forces that have effected both the study and interpretation of rural population change and offers provocative suggestions A final chapter summarizes major changes in rural America explains how migration continues to shape current rural populations and identifies critical issues for future migration research An important tool for students and scholars this volume will also be of particular interest to those readers studying population migration and rural communities **Rural Migration in the United States** Charles Elson Lively, Conrad Taeuber, 1939

**Internal Migration in Contemporary India** Deepak K. Mishra, 2025-10-31 This book explores internal migration in contemporary India from various vantage points and examines its relationship with development Showcasing a multidisciplinary understanding of the processes and experiences of migration it looks specifically at the fragmented nature of the migration process Internal migration in India is considered to be low in comparative terms However structural changes over the past few decades have resulted in increasing regional disparities in economic growth which has fuelled a new wave of migration Migration has also raised some fundamental questions about how states and societies have handled mobility and the political economic and cultural reactions that they have generated The volume explores the role of the state and civil society in the backdrop of conflicts among host and migrant populations in several parts of India exploitation and marginalisation of migrants based on their class caste religion gender ethnicity and regional location and the changing policy framework that deals with migration in post reforms India This revised second edition also addresses the relatively newer dimensions of internal migration including the implications of the COVID 19 pandemic policy frameworks for addressing the vulnerability of migrant labourers and the linkages between migration and social reproduction Comprehensive and insightful this book will be of interest to researchers of economics sociology labour studies development studies and geography besides being useful to research organisations UN agencies and government departments

*Migration and Gender in the Developed World* Paul

Boyle, Keith Halfacree, 2002-11 This book demonstrates how migration is highly gendered with the experiences of women and men often varying markedly in different migration situations Migration in Africa Michiel de Haas, Ewout

Frankema, 2022-03-30 This book introduces readers to the age of intra African migration a period from the mid 19th century onward in which the center of gravity of African migration moved decisively inward Most books tend to zoom in on Africa's external migration during the earlier intercontinental slave trades and the more recent outmigration to the Global North but this book argues that migration within the continent has been far more central to the lives of Africans over the course of the last two centuries The book demonstrates that only by taking a broad historical and continent wide perspective can we understand the distinctions between the more immediate drivers of migration and deeper patterns of change over time During the 19th century Africa's external slave trades gradually declined whilst Africa's expanding commodity export sectors drew in domestic labor This led to an era of heightened mobility within the region marked by rapidly rising and vanishing migratory flows increasingly diversified landscapes of migration systems and profound long term shifts in the wider patterns of migration This era of inward focused mobility reduced with a resurgence of outmigration after 1960 when Africans became more deliberate in search of extra continental destinations with new diaspora communities emerging specifically in the Global North Broad ranging in its temporal spatial and thematic coverage this book provides students and researchers with the perfect introduction to age of intra African migration Rural Migration in the United States C. E. Lively, 2008-05 Many

of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive We are republishing these classic works in affordable high quality modern editions using the original text and artwork **Economic development and the evolution of internal migration. Moving in steps, returnees, and gender differences** Food and Agriculture Organization of the United Nations, 2019-02-15 This paper sheds new light on internal migration processes by estimating migration flows for 31 countries focusing on step migration and on return migration back to rural areas from urban areas The approach is to estimate the shares of the population by gender that move or stay in rural and urban areas over three periods childhood and two forward periods Using data from Demographic and Health Surveys DHS the estimation was done with an information theoretic procedure using maximum entropy econometrics to estimate migration frequencies by population groups Sizeable urban to rural migration flows are found with rural returnees often contributing substantially to urban to rural flows This phenomenon is more pronounced in countries in relatively early phases of development and among male migrants The analysis also confirms anecdotal evidence that migrants move in several steps and that internal migration patterns vary considerably according to gender however in countries that are further along the path of structural transformation and particularly urbanization the magnitude of migration flows appears to be similar across genders International Migration and Rural Areas Myriam Simard, 2016-04-22

While immigrants are still predominantly choosing urban areas to locate to there is now increasing evidence of immigration

to rural areas which poses its own challenges for those relocating from the scarcity of high quality jobs to the provision of public and private services Addressing the shortcomings in current research this book employs an innovative approach by exploring this relationship from a cross national comparative global perspective It draws lessons from case studies across a range of geographical and political contexts including Canada the USA Ireland Scotland Greece and Russia Bringing together migration experts from a range of academic disciplines International Migration and Rural Areas contributes to conceptual developments and also identifies policy concerns which can be pursued at national sub national and supra national levels As such it will appeal to policy makers as well as scholars across a range of disciplines including geography politics demography social policy sociology and anthropology *OECD Regional Development Studies The Contribution of Migration to Regional Development* OECD,2022-03-10 This report aims to address these questions using two novel datasets that offer internationally comparable information on migration and migrants labour market integration across cities towns and rural areas in OECD countries The report also analyses different dimensions of regional development and provides new evidence on how migrants contribute to regional income innovation international trade and labour markets Circular Migration in Zimbabwe & Contemporary Sub-Saharan Africa Deborah Helen Potts,2010 The World Bank insists that the urban share of sub Saharan Africa s population is rapidly increasing this study shows that in many countries this is no longer true as migration strategies have adapted in response to economic and political change Circular migration whereby rural migrants do not remain permanently in town has particular significance in the academic literature on development and urbanization in Africa often having negative connotations in southern Africanist studies due to its links with an iniquitous migrant labour system Literature on other African regions often views circular migration more positively This book reviews the current evidence about circular migration and urbanization in sub Saharan Africa The author challenges the dominant view that rural urban migration continues unabated and shows that circular migration has continued and has adapted with faster out migration in the face of declining urban economic opportunities The empirical core of the book illustrates these trends through a detailed examination of the case of Zimbabwe based on the author s longstanding research on Harare The political and economic changes in Zimbabwe since the 1980s transformed Harare from one of the best African cities to live in over this period to one of the worst Harare citizens livelihoods exemplify in microcosm the central theme of the book the re invention of circulation and rural urban links in response to economic change Deborah Potts is a Senior Lecturer in the Geography Department of King s College London She works in the broad research field of urbanization and migration in sub Saharan Africa particularly southern Africa and has conducted research on these themes in Harare in Zimbabwe since 1985 Southern Africa South Africa Botswana Lesotho Swaziland Namibia and Zimbabwe University of Cape Town Press PB

**Rural-urban Migration in Developing Countries** Somik V. Lall,Harris Selod,2006 The migration of labor from rural to urban areas is an important part of the urbanization process in developing countries Even though it has been the focus of

abundant research over the past five decades some key policy questions have not found clear answers yet To what extent is internal migration a desirable phenomenon and under what circumstances Should governments intervene and if so with what types of interventions What should be their policy objectives To shed light on these important issues the authors survey the existing theoretical models and their conflicting policy implications and discuss the policies that may be justified based on recent relevant empirical studies A key limitation is that much of the empirical literature does not provide structural tests of the theoretical models but only provides partial findings that can support or invalidate intuitions and in that sense support or invalidate the policy implications of the models The authors broad assessment of the literature is that migration can be beneficial or at least be turned into a beneficial phenomenon so that in general migration restrictions are not desirable They also identify some data issues and research topics which merit further investigation World Bank web site **New**

**Directions in Urban-Rural Migration** David L. Brown, John M. Wardwell, 2013-10-02 New Directions in Urban Rural Migration The Population Turnaround in Rural America covers a wide ranging treatment of urban rural migration and population growth in contemporary America The book discusses the national and regional changes in internal migration and population distribution the regional diversity and complexity of economic structure in modern day rural America and the reasons for the gap or lag between changed conditions and unchanged policy The text also describes the turnaround s implications for new models of migration the economic framework for the turnaround and the traditional concept of the migrant as labor and the structural conditions within and between areas that fix the demand for labor Migration trends and consequences in rapidly growing areas as well as data resources for population distribution research are also considered Sociologists and people involved in studying migration will find the book invaluable The Economics of Migration in the Volta Basin of Ghana Daniel Tsegai, 2005 **population migration in rural america , Census of India, 1971:**

**Mehrotra, G. K. Birth place migration in India** India. Office of the Registrar General, 1974 **Rural Retirement Migration** David L. Brown, Nina Glasgow, 2008-03-27 This book examines the migration of older persons to rural retirement destinations in the United States While the majority of older persons are residentially stable those who migrate are disproportionately likely to move to a rural community Moreover with the aging of the baby boom generation particular rural communities can expect to continue attracting older in migrants in the future The book examines rural retirement migration from the older in migrants perspective and from the vantage point of the destination communities to which they move This integrated micro macro approach permits the authors to view older in migrants as embedded in particular types of environments that facilitate and or constrain their opportunities for productive living during older age It also permits the examination of positive and negative effects of older in migration for destination communities The authors use a multiple methods approach featuring a panel survey of older in migrants and longer term older residents in depth community case studies and county level census data analysis to produce a grounded study of population aging in the context of rural society

The analysis examines the challenges and opportunities presented by migration at older ages both for successful aging and for community development. The book pays particular attention to the process through which older in migrants become socially integrated in their new communities and it contains rich detail on the social relationships they form, the nature of their civic engagement and the positive and negative reactions they elicit from longer term residents. The volume concludes with a thoughtful discussion of policy lessons learned from the research and with an examination of high priority research needs on retirement migration. From the reviews: This is not just another book; it is a necessary book, the result of plentiful research and of a balanced work project. *Environment and Planning A* 2009 Volume 41
