**History of Nordic Computing 4** Christian Gram, Per Rasmussen, Søren Duus Østergaard, 2015-05-05 This book constitutes the refereed post proceedings of the 4th IFIP WG 9.7 Conference on the History of Nordic Computing HiNC 4 held in Copenhagen Denmark in August 2014. The 37 revised full papers were carefully reviewed and selected for inclusion in this volume. The papers focus on innovative ICT milestones that transformed the Nordic societies and on the new ideas, systems and solutions that helped creating the welfare societies of today, in particular solutions and systems for public services e.g. tax, social benefits, health care and education, solutions and systems for the infrastructure of the society e.g. banking, insurance, telephones, transport and energy supply and technologies and IT policies behind the major IT milestones e.g. user-centric innovation, programming techniques and IT ethics. They are organized in topical sections on IT policy, infrastructure, public services, private services, telesystems, health care, IT in banking, transport and IT technology. The Amphibians & Reptiles of the Bay Islands and Cayos Cochinos, Honduras James R. McCranie, Larry David Wilson, Gunther Köhler, 2005. **No Go World** Ruben Andersson, 2022-03 From the Afghan/Pakistan borderlands to the Sahara, images of danger depict a new world disorder on the global margins. With vivid detail, Ruben Andersson traverses this terrain to provide a startling new understanding of what is happening in remote danger zones. Andersson takes aim at how Western states and international organizations conduct military aid and border interventions in a dangerously myopic fashion, further disconnecting the world's rich and poor. Risk-obsessed powers are helping to remap the world into zones of insecurity and danger, resulting in a vision of chaos crashing into fortified borders. Andersson contends that we must reconnect and snap out of this dangerous spiral which affects us no matter where we are. Only by developing a new cartography of hope can we move beyond the political geography of fear that haunts us. Collectively they constitute a major biodiversity hotspot, a region rich in endemic species that are threatened with extinction. This two-volume series documents the existing status of herpetofaunas, including sea turtles of the Caribbean, and highlights conservation needs and efforts. Previous contributions to West Indian herpetology have focused on taxonomy, ecology and evolution, particularly of lizards. This series provides a unique and timely review of the status and conservation of all groups of amphibians and reptiles in the region. This volume introduces the issues particularly affecting Caribbean herpetofaunas and gives an overview of evolutionary and taxonomic patterns influencing their conservation. **Art in Sweden** Sören Engblom, 1998 Om svensk konst i 1990-erna. **The**
