Parallel Digital Implementations Of Neural Networks:

Parallel Digital Implementations of Neural Networks K. Wojtek Przytula,V. K. Prasanna Kumar,1993 Explores issues related to implementing artificial neural networks on programmable massively parallel computers and special purpose digital programmable VLSI architectures The nine contributions cover mapping methodologies and implementations digital neurocomputers and architectural building blocks Annotation copyright by Book News Inc Portland OR **VLSI — Compatible Implementations for Artificial Neural Networks** Sied Mehdi Fakhraie,Kenneth C. Smith,2012-12-06 This book introduces several state of the art VLSI implementations of artificial neural networks ANNs It reviews various hardware approaches to ANN implementations analog digital and pulse coded The analog approach is emphasized as the main one taken in the later chapters of the book The area of VLSI implementation of ANNs has been progressing for the last 15 years but not at the fast pace originally predicted Several reasons have contributed to the slow progress with the main one being that VLSI implementation of ANNs is an interdisciplinary area where only a few researchers academics and graduate students are willing to venture The work of Professors Fakhraie and Smith presented in this book is a welcome addition to the state of the art and will greatly benefit researchers and students working in this area Of particular value is the use of experimental results to backup extensive simulations and in depth modeling The introduction of a synapse MOS device is novel The book applies the concept to a number of applications and guides the reader through more possible applications for future work I am confident that the book will benefit a potentially wide readership M I Elmasry University of Waterloo Waterloo Ontario Canada Preface Neural Networks NNs generally defined as parallel networks that employ a large number of simple processing elements to perform computation in a distributed fashion have attracted a lot of attention in the past fifty years As the result many new discoveries have been made
