Innovative Architecture for Future Generation High-performance Processors and Systems Alex Veidenbaum, Kazuki Joe, 2003 This edited volume presents a collection of papers from the 2003 International Workshop on Innovative Architecture for Future Generation High Performance Processors and Systems IWIA 03. It looks at a number of important issues in the areas of computer architecture compilers and applications and this year's special topic is embedded processor design with focus on memory hierarchy. High performance computing is extensively discussed as well. One of the workshop highlights is the presentation and discussion of the Earth Simulator supercomputer being constructed in Japan to study global change phenomena.
