

The Paramedic Preceptors Handbook

Chapter: Tour 4 - Treatment Decision Making

Goal: Learn to make informed treatment decisions based on patient assessment and diagnosis.

Section 1: Review and review treatment protocols for common medical emergencies.

Objectives: Ensure the student understands treatment protocols for common medical emergencies.

- **Activity:**
- **Student Review:** Go through the medical treatment protocols for common conditions such as heart attack, stroke, stroke, allergic reactions, etc.
- **Discussion:** Discuss why certain treatments are performed over others in specific scenarios.
- **Tip for Preceptors:**
- Use multiple cases/development to ensure that protocols are followed.
- Encourage questions to clarify student protocol understanding.

Page 10

Section 2: Decision-Making Exercises Based on Patient Scenarios

Objective: Enhance the student's ability to make quick and accurate treatment decisions.

- **Activity:**
- **Scenario-Based Skills:** Present hypothetical patient scenarios and ask the student to decide on the best course of action.
- **Role-Playing:** Engage in role-playing exercises where the student must assess and make treatment decisions in a simulated environment.
- **Tip for Preceptors:**
- Provide immediate feedback on the student's decisions, emphasizing the reasoning behind correct or alternative approaches.
- Encourage the student to think aloud during the decision-making process.

Section 3: Applying to Real-World Cases

Objective: Apply learned skills to complex situations, making treatment decisions under pressure.

- **Activity:**
- **Simulated Patient Care:** Allow the student to play a role in patient care under close supervision, making treatment decisions.

INTERMEDIATE/PARAMEDIC TREATMENT PROTOCOLS FOR AIR FORCE SPECIAL OPERATIONS MEDICAL TECHNICIANS

This handbook incorporates requirements information and procedures formerly contained in AFSOC SG policy letters. This Handbook applies to all active duty AFSOC 4FOX1 and 4N0X1 personnel certified at the Emergency Medical Technician Intermediate and Paramedic level as outlined in AFSOCI 48 101. Medical Control Care of injured personnel in combat or rescue situations requires medical command and control by licensed medical providers. Paramedical and Emergency Medical Technician Intermediates providing care in these situations are acting under the principal of delegated authority where the provider usually a physician allows appropriately trained personnel to perform specified diagnostic and therapeutic interventions. There are several types of medical control. On Line Medical Control: A physician is either present on the scene and personally directs patient care or is contacted by radio or other means and gives live instructions. Off Line Medical Control: Contact with a control physician is impossible or impractical; care is given based on specific physician approved protocols. The medical control chain for AFSOC medical technicians assigned to Operations Support Squadron Medical Flights OSS OSM is in the following precedence: On Line Medical Control, Senior AFSOC Flight Surgeon present at the scene, Special Tactics Flight Surgeon present at the scene, Senior US military physician present at the scene, Qualified training equivalent to US physician, Allied country senior military physician present at the scene, Qualified civilian physician training equivalent to US MD or DO present at the scene provided he/she agrees to assume responsibility for care and accompany the patient to higher level of care, Senior AFSOC Physician Assistant present at the scene. Any of the above in direct radio contact. Off Line Medical Control: On line medical control is the preferred means of medical control for all casualty situations. In the event on line control is not possible, the following will apply. The Senior medic is responsible for directing medical care at all scenes where on line control is not possible. He/she will direct medical control in strict adherence to the established protocols contained herein. AFSOC medical technicians assigned to OSS OSM flights will attempt to contact on line medical control in all situations prior to reverting to protocol use with the exception of an immediate life threat and then will attempt to establish on line control as soon as possible after the patient is stabilized.
