Parametric Estimation:

Parametric estimation Madanlal T. Wasan,1974 **Statistical Inference for Fractional Diffusion Processes** B. L. S. Prakasa Rao,2011-07-05 Stochastic processes are widely used for model building in the social physical engineering and life sciences as well as in financial economics In model building statistical inference for stochastic processes is of great importance from both a theoretical and an applications point of view This book deals with Fractional Diffusion Processes and statistical inference for such stochastic processes The main focus of the book is to consider parametric and nonparametric inference problems for fractional diffusion processes when a complete path of the process over a finite interval is observable Key features Introduces self similar processes fractional Brownian motion and stochastic integration with respect to fractional Brownian motion Provides a comprehensive review of statistical inference for processes driven by fractional Brownian motion for modelling long range dependence Presents a study of parametric and nonparametric inference problems for the fractional diffusion process Discusses the fractional Brownian sheet and infinite dimensional fractional Brownian motion Includes recent results and developments in the area of statistical inference of fractional diffusion processes Researchers and students working on the statistics of fractional diffusion processes and applied mathematicians and statisticians involved in stochastic process modelling will benefit from this book **Semiparametric and Nonparametric Methods in Econometrics** Joel L. Horowitz,2010-07-10 Standard methods for estimating empirical models in economics and many other fields rely on strong assumptions about functional forms and the distributions of unobserved random variables Often it is assumed that functions of interest are linear or that unobserved random variables are normally distributed Such assumptions simplify estimation and statistical inference but are rarely justified by economic theory or other a priori considerations Inference based on convenient but incorrect assumptions about functional forms and distributions can be highly misleading Nonparametric and semiparametric statistical methods provide a way to reduce the strength of the assumptions required for estimation and inference thereby reducing the opportunities for obtaining misleading results These methods are applicable to a wide variety of estimation problems in empirical economics and other fields and they are being used in applied research with increasing frequency The literature on nonparametric and semiparametric estimation is large and highly technical This book presents the main ideas underlying a variety of nonparametric and semiparametric methods It is accessible to graduate students and applied researchers who are familiar with econometric and statistical theory at the level taught in graduate level courses in leading universities The book emphasizes ideas instead of technical details and provides as intuitive an exposition as possible Empirical examples illustrate the methods that are presented This book updates and greatly expands the author s previous book on semiparametric methods in econometrics Nearly half of the material is new **Parametric Estimation** M. T. Wasan,1967 **Information Spillover Effect and Autoregressive Conditional Duration Models** Xiangli Liu,Yanhui Liu,Yongmiao Hong,Shouyang Wang,2014-07-11 This book studies the

information spillover among financial markets and explores the intraday effect and ACD models with high frequency data This book also contributes theoretically by providing a new statistical methodology with comparative advantages for analyzing comovements between two time series It explores this new method by testing the information spillover between the Chinese stock market and the international market futures market and spot market Using the high frequency data this book investigates the intraday effect and examines which type of ACD model is particularly suited in capturing financial duration dynamics The book will be of invaluable use to scholars and graduate students interested in comovements among different financial markets and financial market microstructure and to investors and regulation departments looking to improve their risk management Project Management ,2026-01-10 Project Management is a practical comprehensive guide designed for leaders managers trainers and students It covers the complete project lifecycle including planning execution monitoring control risk management stakeholder engagement and governance Aligned with the BSB training package it provides clear structured guidance for vocational education professional development and workplace application The textbook is supported by quizzes and assessment ready material for RTOs and training institutions Compiled by Zaheer Siddiqui with over 35 years of industry and L D experience this textbook bridges academic learning with real world communication practice It is ideal for students managers and trainers involved in vocational education and professional development

Asymptotic Properties of Parametric and Nonparametric Estimators of Continuous and Discrete Time Markov Processes Valentina Corradi,1994 **Stochastic Geometry** David Coupier,2019-04-09 This volume offers a unique and accessible overview of the most active fields in Stochastic Geometry up to the frontiers of recent research Since 2014 the yearly meeting of the French research structure GDR GeoSto has been preceded by two introductory courses This book contains five of these introductory lectures The first chapter is a historically motivated introduction to Stochastic Geometry which relates four classical problems the Buffon needle problem the Bertrand paradox the Sylvester four point problem and the bicycle wheel problem to current topics The remaining chapters give an application motivated introduction to contemporary Stochastic Geometry each one devoted to a particular branch of the subject understanding spatial point patterns through intensity and conditional intensities stochastic methods for image analysis random fields and scale invariance and the theory of Gibbs point processes Exposing readers to a rich theory this book will encourage further exploration of the subject and its wide applications A Guide to Econometrics Peter Kennedy,2003 A popular intuitively based overview of econometrics

Databases and Nutrition, volume II Alessandra Durazzo,Massimo Lucarini,Igor Pravst,2023-12-12 *Parametric Estimation Using Computer Intensive Methods* Leif Nilsson,1998 *Semiparametric Estimation of Selectivity Models* Markus Frölich,2002 **Signal Analysis and Estimation** Ronald Louis Fante,1988-01-18 This work introduces the analysis using Fourier techniques of continuous and discrete deterministic signals along with both estimation and spectral analysis of random signals It is divided into two sections Chapters 1 5 are devoted to the analysis of continuous and discrete

deterministic signals while Chapters 6-9 cover the properties spectral analysis and estimation of random signals In addition in order to assist readers examples are liberally included throughout every chapter

Semiparametric Estimation of Value-at-risk Jianqing Fan, Juan Gu, 2003 Parametric Estimation M. T. Wasan, 1967 **Estimation of Multidimensional Diffusions from Discrete Observations for Interest Rate Models** Roberto Malamut, 1999 **Mathematical Modeling, Estimation, and Imaging** David C. Wilson, 2000 A Practitioner's Guide to Robust Covariance Matrix Estimation Wouter J. Den Haan, Andrew T. Levin, 1996

This paper develops asymptotic distribution theory for generalized method of moments GMM estimators and test statistics when some of the parameters are well identified but others are poorly identified because of weak instruments The asymptotic theory entails applying empirical process theory to obtain a limiting representation of the concentrated objective function as a stochastic process The general results are specialized to two leading cases linear instrumental variables regression and GMM estimation of Euler equations obtained from the consumption based capital asset pricing model with power utility Numerical results of the latter model confirm that finite sample distributions can deviate substantially from normality and indicate that these deviations are captured by the weak instruments asymptotic approximations

Long-range Cost Estimation Research Project, 2000 The purpose of this project was to research long range parametric cost estimation at the Colorado Department of Transportation CDOT utilizing AASHTO's Trns port Cost Estimation and Decision Support software Info Tech Inc analysis reviewed CDOT's current long range estimation practices and identified revisions which would be needed to satisfactorily meet CDOT's future cost estimating requirements i e in order to develop consistent and reliable cost estimates when little is known about a project Both item and contract classifications utilized by CDOT in BAMS DSS were revised to reflect more logical functional groupings The new contract work type and item classification were used directly to develop an Interim Solution for Long Range Cost Estimation that uses historical bid based default prices Info Tech analysts also researched Internet sources to identify the availability of major item cost data at the regional and national level including data for multimodal project types

Economic Valuation with Stated Preference Techniques Ian Bateman, 2002 This manual offers a detailed up to date explanation of how to carry out stated preference techniques The techniques use surveys to ask individuals how much they would be willing to pay or willing to accept in compensation for gains or losses of non market goods and services Applications of the technique include changes in air and water quality noise nuisance health care risk recorded heritage cultural assets habitats Landscape and so on It shows how to choose the most appropriate technique and how to design the questionnaires Detailed advice on econometric analysis is provided as well as explanation of the pitfalls that need to be avoided
