Agassi,2012-12-06 There is a curious parallel between the philosophy of science and psychiatric theory The so called demarcation question which has exercised philosophers of science over the last decades posed the problem of distinguishing science proper from non science in particular from metaphysics from pseudo science from the non rational or irrational or from the untestable or the empirically meaningless In psychiatric theory the demarcation question appears as a problem of distinguishing the sane from the insane the well from the mentally ill The parallelism is interesting when the criteria for what fails to be scientific are seen to be congruent with the criteria which define those psychoses which are marked by cognitive failure In this book Dr Yehuda Fried and Professor Joseph Agassi a practicing psychiatrist and a philosopher of science respectively focus on an extreme case of psychosis paranoia as an essentially intellectual disorder that is as one in which there is a systematic and chronic delusion which is sustained by logical means They write Paranoia is an extreme case by the very fact that paranoia is by definition a quirk of the intellectual apparatus a logical delusion p 2 **Paranoia (Start**

Conspiracy and Paranoia in Contemporary American Fiction Steffen Hantke, 1994 Under the influence of Thomas Pynchon a generation of postmodern American writers has explored the theme of conspiracy and paranoia its origins in contemporary American culture and its political and ideological ramifications This intense preoccupation with paranoid forms of conceptual organization has helped critics to represent postmodernism as a coherent phenomenon and define it as a period While for many readers the assumption of periodic homogeneity is still valid postmodern fiction has in fact been diversifying rapidly in the course of its development over the last 20 years In the works of Don DeLillo and Joseph McElroy a new set of narrative premises which mark a significant paradigmatic shift within postmodern American fiction has begun to emerge from the dialogic interplay with Pynchonesque paranoia

The Soft Machine David Porush, 2018-05-15 *The Soft Machine* originally published in 1985 represents a significant contribution to the study of contemporary literature in the larger cultural and scientific context David Porush shows how the concepts of cybernetics and artificial intelligence that have sparked our present revolution in computer and information technology have also become the source for images and techniques in our most highly sophisticated literature postmodern fiction by Barthelme Barth Pynchon Beckett Burroughs Vonnegut and others With considerable skill Porush traces the growth of the metaphor of the machine as it evolves both technologically and in
