Parapsychology The Controversial Science:

Parapsychology Richard S. Broughton, 1991 This is the best piece of writing for the public on serious parapsychology to come along in many years. It is both well written and well timed, providing hot off the press coverage of the most recent developments in parapsychological research and thinking. ROBERT L. MORRIS Koestler Chair of Parapsychology, University of Edinburgh. In this impressively documented work, Dr. Richard S. Broughton, Director of Research at the world renowned Institute of Parapsychology, illuminates the history and evolution of parapsychology and directly addresses the raging controversy over its very existence as a science. At the heart of the book, he brings together a broad range of recent parapsychological research from the U.S., China, and the former Soviet Union, complete with full descriptions of the actual techniques and explanations of how researchers apply scientific methods to study the baffling experiences that qualify as psi phenomena. Selected by the Quality Paperback Book Club. From the Trade Paperback edition. **Paranormal Phenomena**

Patricia D. Netzley, 2000 Discusses paranormal phenomena including psychic connections, predicting the future, the mind-body connection, spirits, sprites, aliens, and faith healing. **Forbidden Science** Richard Milton, 1994 The contributors to this collection offer an essential introduction to the ways in which feminist linguistics and critical discourse analysis have contributed to our understanding of gender and sex. By examining how these perspectives have been applied to these concepts, the contributors provide both a review of the literature as well as an opportunity to follow the most recent debates in this area. *Gender and Discourse* brings together European, American, and Australian traditions of research. Through an analysis of a range of real data, the contributors demonstrate the relevance of these theoretical and methodological insights for gender research in particular and social practice in general. *Controversies in Psychology* Andrew M. Colman, 1995 Topics covered include psychic research, out-of-body experiences, the physiology of hypnosis, eyewitness testimony, and psychological aspects of illness and healthcare. Library of Congress Subject Headings Library of Congress, Library of Congress, Office for Subject Cataloging Policy, 2004. *The Journal of the American Society for Psychical Research*, 2002

Explaining the Unexplained Hans Jürgen Eysenck, Carl Sargent, 1993. *The Philosophy of Human Nature* Howard P. Kainz, 2008 Are humans unique among animals and if so, what makes humans human? Is human freedom a delusion? Do people possess paranormal powers? How do the sexes differ? Are personality traits and intelligence inherited? Can we expect to survive bodily death? Howard Kainz looks for the best available answers to these and other questions, drawing upon classical and recent philosophy as well as the current state of scientific knowledge. His approach is open-minded and adventurous and yields some surprising insights. **BOOK JACKET** Love Beyond Life Joel Martin, Patricia Romanowski, 1998 A fascinating look at the encounters of love that cross all boundaries; this insightful book explores how life after death experiences can help

people overcome their grief and develop a deeper understanding of the life that continues after death **Exploring the Powers of Your Inner Mind** Jaime T. Licauco, 2005 **Poltergeists** Michael Clarkson, 2006 A compelling examination of poltergeist phenomena At least thirty five police officers around the world in at least thirteen separate cases dating back to 1952 claim to have witnessed some form of poltergeist activity Nine of them were assaulted by what they say was a poltergeist but none was seriously injured and no one has been charged nor have the mysteries been solved definitively There are numerous cases of hauntings studied throughout the world every year many of which hold up to close scrutiny Poltergeists takes a look at a number of these in depth case studies An eleven year old boy inhabited by a poltergeist who causes photographs to become moving pictures and elevates a chair with a police officer sitting on it Fourteen year old Tina Resch who with her anger appears to make glasses airborne move tables and send telephones flying The Hodgson family who are terrorized by flying Lego pieces that are hot to the touch and furniture that moves of its own accord usually in the presence of eleven year old Janet Eleven year old Virginia Campbell who seems to cause heavy furniture to move at home and desks to float at school always in twenty eight day cycles A twelve year old Kentucky boy who subconsciously moves heavy objects in the presence of two parapsychologists watching him closely for signs of trickery For his investigations Clarkson interviewed hundreds of witnesses paranormal experts psychologists professors magicians and skeptics While it may raise as many questions as it answers Poltergeists is an undeniably fascinating study of the paranormal *Haunted Houses* Michael O'Neal, 1994 The author examines the nature of hauntings and the ways ghost hunters attempt to find out the truth When Beds Float Michael Clarkson, 2005 As a daily newspaper reporter for 38 years and author of four books on fear management and stress I did not enter lightly into a book on poltergeists Some of my colleagues who know me as an investigator of everything from the Aids epidemic to serial killers to nepotism in government hiring may shudder at the thought of my now entering into the shadowy world of the paranormal In fact I have been considering this topic for more than 25 years Michael Clarkson has been skeptical about things involving intuition ESP and the supernatural However during a 1970 investigation in St Catherines Ontario he changed his mind It was a case of a poltergeist In fact there are numerous legitimate cases of poltergeist throughout the world every year People have observed objects flying across rooms propelled by unknown powers and some of these cases do bear closer examination When Beds Float examines 50 poltergeist cases Michael Clarkson interviewed hundreds of witnesses paranormal experts psychologists professors magicians and skeptics to assemble this series of so called hauntings At the end of his investigation he concludes that there may exist enough evidence to suspect there is something going on from time to time that defies the laws of physics Some of the cases raise as many questions as they provide answers others could be trickery In all cases however there seems to be a child or adolescent involved who may or may not be the inadvertent cause of the phenomena This is a spooky book for a fun read on a dark and stormy night Caledon Living **Beyond the Light** P.
