social status quo and concentrated on art previously omitted from critical study because of its political or social agenda. Today the dialogue between the two increasingly exhausts itself in mutual accusations of ideological partisanship. The essays collected in this volume dress this rift by re-introducing the notion of aesthetic which has tended to be obliterated from critical discourse in American literature. They draw attention to the fact that the literary imagination represents a specific social field of meaning production and calls for a specific attitude of the reader towards language as a means of reality production. In their close readings the authors analyze the actual strategies of the cultural political work of literature. Consequently their analyses highlight both the critical evaluations concerning the political implications of literary form and the different historical functions a text can fulfill at the time of its publication and later on.
