

SEYMOUR B. SARASON

# PARENTAL INVOLVEMENT AND THE POLITICAL PRINCIPLE

Why the Existing  
Governance Structure  
of Schools  
Should Be Abolished

# Parental Involvement And The Political Principle

**Daniel Paul King**

## **Parental Involvement And The Political Principle:**

**Parental Involvement and the Political Principle** Seymour B. Sarason, 1995-03-08 Sarason's searching analysis of American school governance raises what may be the most fundamental questions confronting school reform: Who participates? Who decides? On what basis? His answers strike to the heart of democratic life and create new possibilities for democratic education. Sarason pushes us to look beyond the bureaucracy to invent inclusive forms of schooling that engage the minds, hearts, and voices of parents, students, and teachers together. It is impossible to leave this book without a commitment to work toward an answer that will work for children. Linda Darling-Hammond, Teachers College, Columbia University

**The Skeptical Visionary** Seymour Bernard Sarason, 2003 Seymour Sarason, in the words of Carl Glickman, is one of America's seminal thinkers about public education. For over four decades, he has been a voice of much-needed skepticism about our plans for school reform, teacher training, and educational psychology. Now, for the first time, Sarason's essential writings on these and other issues are collected together, offering students and researchers alike, with the range, depth, and originality of Sarason's contributions to American thinking on schooling. As we go from debate to debate on issues such as school choice, charter schools, inclusive education, national standards, and other problems that seem to drag on without solution, Sarason's critical stance on the folly of many of our attempts to fix schools has always had at the center a concern for the main players in our educational institutions: the students, the teachers, and the parents. Any plans that cannot account for their well-being are doomed to failure. And in the face of such failure, the clarity of Sarason's vision for real educational success is a much-needed antidote to much of the rhetoric that currently passes for substantial debate. A wide-ranging and comprehensive selection of Sarason's most significant writings, *The Skeptical Visionary* should find a prized space on any student's or teacher's bookshelf.

Author note: Robert Fried, Associate Professor in the School of Education at Northeastern University and is the author of *The Passionate Teacher: A Practical Guide* and *The Passionate Learner: How Teachers and Parents Can Help Children Reclaim the Joy of Discovery*. Seymour Sarason is Professor Emeritus in the Department of Psychology at Yale University. He is the author of over forty books and is considered to be one of the most significant researchers in education and educational psychology in the country.

**Resources in Education**, 1995

**Educational Reform** Seymour Bernard Sarason, 2002-07-25 Professor Sarason candidly confronts his errors of omission and commission, mistakes and emphases in his half-century involvement in educational reform. No other major figure in this arena has made public such a searching self-critique. Sharing his thoughts about the future of education, Sarason discusses his thinking on charter schools, productive learning, motivation, high-stakes testing, the need for teachers to relate differently to each other and to parents, the importance of working through change, and the mistaken idea that we can clone reforms. Although written before the September 11th World Trade Center tragedy, the last chapter of this book is extraordinarily relevant to the subsequent national importance of societal values and responsible citizenship. Although this is a deliberately personally revealing book, Sarason's self-scrutiny

will be stimulating and invaluable to anyone interested in reform as concept action and values      *Controlling Public Education* Kathryn A. McDermott, 1999 Most Americans believe that local school districts are the only means by which citizens may exercise control over public education Kathryn McDermott argues to the contrary that existing local institutions are no longer sufficient for achieving either equity or democratic governance Not only is local control inequitable it also fails to live up to its reputation for guaranteeing public participation and citizen influence Drawing upon democratic theory and the results of field research in New Haven Connecticut and three suburbs McDermott contends that our educational system can be made more democratic by centralizing control over funding while decentralizing most authority over schools to the level of schools themselves while enacting public school choice controlled for racial balance To many people in Connecticut and elsewhere the tension between equal opportunity for all students and local control of public education seems impossible to resolve In 1996 the Connecticut Supreme Court ruled in *Sheff v O'Neill* that local control produces unconstitutional segregation of public schools Nearly all of the state's 169 towns operate their own public schools and like the towns they serve the schools are generally homogeneous with respect to race and socioeconomic class In the *Sheff* ruling the court declared that making school districts coterminous with town lines is the single most important factor contributing to the present concentration of racial and ethnic minorities in the Hartford public school system At the same time the court also acknowledged that the town based school system presently furthers the legitimate nonracial interests of permitting considerable local control and accountability in educational matters In Connecticut and elsewhere it has often seemed necessary to choose between local control and equity in public education and local control has almost always won McDermott argues that rather than seeing local control and equity as conflicting goals policymakers should regard them as equally important components of democracy in public education In her view a truly democratic system of education should both encourage citizen participation in school governance and contribute to the formation and maintenance of a social order in which equality of opportunity prevails over hierarchies of privilege Centralizing distribution of resources and using controlled choice to end racial isolation would provide greater equality of opportunity while decentralizing management of schools would expand citizen participation McDermott's conclusions break new ground in our understanding of local school governance itself and call into question the conventional wisdom about local participation These findings should interest those who study school governance and reform especially in an urban setting as well as policy makers administrators teachers students and citizens eager to improve their schools
