Making a Difference in Education Robert Cassen, Sandra McNally, Anna Vignoles, 2015-04-24 What is working in education in the UK and what isn't This book offers a highly readable guide to what the latest research says about improving young people's outcomes in pre school primary and secondary education Never has this issue been more topical as the UK attempts to compete in the global economy against countries with increasingly educated and skilled work forces The book discusses whether education policy has really been guided by the evidence and explores why the failings of Britain's educational system have been so resistant to change as well as the success stories that have emerged Making a Difference in Education looks at schooling from early years to age 16 and entry into Further Education with a special focus on literacy numeracy and IT Reviewing a large body of research and paying particular attention to findings which are strong enough to guide policy the authors examine teacher performance school quality and accountability and the problematically large social gap that still exists in state school education today Each chapter concludes with a summary of key findings and key policy requirements As a comprehensive research review Making a Difference in Education should be essential reading for faculty and students in education and social policy and of great interest to teachers and indeed to anyone who wants to know about the effectiveness of UK education policy and practice and where they should be going

The purpose of the study was to examine the inner workings of secondary schools in low income settings that create high achievement for their students. The schools were selected on the basis of their achievement on provincial school leaving examinations and their socioeconomic status which was based on parental income and education. The sample included both high and low achieving schools to identify the factors that appeared to contribute to or inhibit student success. The report begins with an overview of the study and a brief synopsis of recent school effectiveness and school improvement literature. The characteristics of the schools and a brief portrait of each school are provided followed by an analysis of the patterns and behaviors found in the sample. Case studies were prepared that used a qualitative method and a common framework. The findings show that each school was trying to adapt to rapidly changing environments. The common elements of success found among the schools were positive attitudes and high expectations, strong and vigilant administration, a focus on academic achievement and recognition of the need to be accountable for performance.
