Grese, 1992 Jens Jensen was one of America's greatest landscape designers and conservationists Using native plants and fitting designs he advocated that our gardens parks roads playgrounds and cities should be harmonious with nature and its ecological processes a belief that was to become a major theme of modern American landscape design When Jensen died in 1951 at the age of 90 the New York Times called him the dean of American landscape architecture In Jens Jensen Maker of Natural Parks

and Gardens Robert E Grese evaluates Jensen's work against the background of landscape design traditions that included Andrew Jackson Downing and Frederick Law Olmsted as well as earlier movements in Europe. Grese examines Jensen's part in the Chicago cultural renaissance that occurred just prior to World War I a movement that brought social reform a new understanding of ecology organic trends in architecture and great strides in American literature. Drawing on Jensen's writings and plans interviews with people who knew him and analyses of his projects Grese presents a clear picture of Jensen's efforts to enhance and preserve native landscapes. Jens Jensen worked with some of the leading architects of his day Sullivan and Wright among them so many of his projects involved the extravagant estates of wealthy entrepreneurs in Illinois Michigan Wisconsin and elsewhere. But Jensen also worked on schools parks playgrounds hospitals institutional homes and government buildings. Long before environmental activists took over the idea he foresaw the need to preserve the dunes forests prairies and wetlands native to the Middle West. He championed the network of forest preserves around Chicago protection of the Indiana Dunes now a national lakeshore the state park system in Illinois and numerous parks in Wisconsin. Jens Jensen Maker of Natural Parks and Gardens offers a compelling look at Jensen's visionary work and remarkable career.

*Parks and Gardens in Greater Paris* Jacqueline Widmar Stewart, 2012 For over 350 years Parisians have designed and preserved phenomenal public outdoor spaces. In this book Jacqueline Widmar Stewart follows the fine spun threads of the parklands tapestry in greater Paris. Identification of various hallmarks of premiere park building eras imbues individual parks with multi dimensional qualities and allows readers to experience these grand green places in the way Parisians do. Multiple layers of elements and themes are woven into the fabric of French parks. Reaching back as far as its Roman heritage vestiges of the history of Paris are apparent in virtually all its parks regardless of size. Even the balanced distribution of green spaces throughout the city reflects a major 19th century city planning epoch and is still carried forward in current park development. A number of French parks and gardens from the 17th century initially belonged to royal estates but now welcome public visits. It should be noted that the Tuileries first opened its gates to the public in 1667. Thoughtfully designed and meticulously tailored to needs of the time others have covered unsightly urban blight with splendor and have converted industrial sites to recreational usage while maintaining cultural ties with the past. Many marvels beckon all who enter Paris magical spheres a several kilometer long landscaped promenade above busy streets a modern garden suspended above a major train station the Parc de la Villette with its grand red architectural curiosities of form and motion a midisland all e in the Seine newly created marshlands now home to mallard ducklings clouds of fragrance from rose descendants of Josephine Bonaparte's original collection not one but two gardens of the quintessential sculptor Auguste Rodin.
