## Parliament The Press And The Colonies 1846 1880:

**Parliament, the Press, and the Colonies, 1846-1880** Stanley R. Stembidge,1982 *Constitutionalism, Legitimacy, and Power* Kelly L Grotke,Markus J Prutsch,2014-09-25 If one counts the production of constitutional documents alone the nineteenth century can lay claim to being a constitutional age one in which the generation and reception of constitutional texts served as a centre of gravity around which law and politics consistently revolved This volume critically re examines the role of constitutionalism in that period in order to counter established teleological narratives that imply a consistent development from absolutism towards inclusive participatory democracy Various aspects of constitutional histories within and outside of Europe are examined from a comparative transnational and multidisciplinary historical perspective organized around five key themes The first part looks at constitutions as anti revolutionary devices and addresses state building monarchical constitutionalism and restorations The second part takes up constitutions and the justification of new social inequalities focusing on women s suffrage human rights and property The third part uses individual country studies to take on questions of how constitutions served to promote nationalism The use of constitutions as instruments of imperialism is covered in the fourth part and the final part examines the ways that constitutions function simultaneously as legal and political texts These themes reflect a certain scepticism regarding any easy relationship between stated constitutional ideals and enacted constitutional practices Taken together they also function as a general working hypothesis about the role of constitutions in the establishment and maintenance of a domestically and internationally imbalanced status quo of which we are the present day inheritors More particularly this volume addresses the question of the extent to which nineteenth century constitutionalism may have set the stage for new forms of domination and discrimination rather than inaugurating a period of progress and increasing equality

**Missionary Imperialists?** John H. Darch,2009-04-01 Missionary Imperialists examines the frontiers of empire in tropical Africa and the south west Pacific in the Mid Victorian era Its central theme is the role played by British Protestant missionaries in imperial development and a continuous thread is the interaction between the missions and those in government both London and in the colonies An introductory chapter examines the main missionary societies involved in this study This is followed by six detailed case studies three from the south west Pacific the Pacific labor trade Fiji and New Guinea and three from tropical Africa the Gambia Lagos and Yorubaland and East Africa The crucial importance of influential missionary supporters in Britain is noted as its missionary involvement in wider campaigning networks with other humanitarian groups The book argues that where missionaries did aid imperial development it was largely incidental an imperialism of result rather than an imperialism of intent to use the categories of Cain and Hopkins It will be seen that although there were a few dedicated imperialists in the missionary ranks and others gradually became convinced that the future of their particular mission and its people would be most secure under British jurisdiction the majority had no such enthusiasm Yet this did not mean that they had no effect on imperial development Campaigns against

both slavery and indentured labor inevitably raised the profile and influence of Europeans on the imperial frontier thus shifting a fragile balance in their direction. Most importantly by their very presence on the frontiers of empire and as providers of education and European moral and spiritual values missionaries became incidental and sometimes unintentional but nevertheless effective agents of imperialism

**Steam Power and Sea Power** Steven Gray, 2017-09-25 This book examines how the expansion of a steam powered Royal Navy from the second half of the nineteenth century had wider ramifications across the British Empire. In particular it considers how steam propulsion made vessels utterly dependent on a particular resource coal and its distribution around the world. In doing so it shows that the coal question was central to imperial defence and the protection of trade requiring the creation of infrastructures that spanned the globe. This infrastructure required careful management and the processes involved show the development of bureaucracy and the reliance on the contractor state to ensure this was both robust and able to allow swift mobilisation in war. The requirement to stop regularly at foreign stations also brought men of the Royal navy into contact with local coal heavers as well as indigenous populations and landscapes. These encounters and their dissemination are crucial to our understanding of imperial relationships and imaginations at the height of the imperial age
