Parry Before Jerusalem:

Music and Victorian Liberalism Sarah Collins, 2019-06-06 Examines the interaction between music and liberal discourses in Victorian Britain revealing the close interdependence of political and aesthetic practices **Choral**

Masterpieces Nicholas Tarling, 2014-05-16 In Choral Masterpieces Major and Minor historian Nicholas Tarling surveys the landscape of choral works some standard masterpieces that are commonly performed by choruses around the world others deserving a second closer look As noted in the foreword by Uwe Grodd music director of the Auckland Choral Society this work is a collection of essays about a number of outstanding works including Beethoven's Miss Solemnis and Britten's War Requiem but he also invites attention to lesser masterpieces If the choral movement which includes both singers and listeners is to survive new works must be created and repertory expanded The book is an easy and captivating read even if you are not a chorister Choral Masterpieces Major and Minor features short essays on over 28 works from major masterpieces such as Handel's Messiah and Bach's St Matthew's Passion to off the beaten path choral works such as Samuel Coleridge Taylor's Hiawatha and Frederick Delius A Mass of Life Throughout Tarling offers assessments that sparkle with unique insights and at the same time ground listeners in the historical contexts of the work's production and performance Each work is transformed in Tarling's able hands from musical work into a window into the mind and milieu of the composer Choral Masterpieces Major and Minor mixes choral mainstays with works that demand revisiting Choral singers and their audiences as well as choral societies and their directions and promoters will find ample food for thoughts in these meditations on the choral tradition

[The Symphonic Poem in Britain, 1850-1950](#) Michael Allis, Paul Watt, 2020 The Symphonic Poem in Britain 1850-1950 aims to raise the status of the genre generally and in Britain specifically The volume reaffirms British composers' confidence in dealing with literary texts and takes advantage of the contributors' interdisciplinary expertise by situating discussions of the tone poem in Britain in a variety of historical analytical and cultural contexts This book highlights some of the continental models that influenced British composers and identifies a range of issues related to perceptions of the genre Richard Strauss became an important figure in Britain during this time not only in terms of the clear impact of his tone poems but the debates over their value and even their ethics A focus on French orchestral music in Britain represents a welcome addition to scholarly debate and links to issues in several other chapters The historical development of the genre the impact of compositional models issues highlighted in critical reception as well as programming strategies all contribute to a richer understanding of the symphonic poem in Britain Works by British composers discussed in more detail include William Wallace's Villon 1909 Gustav Holst's Beni Mora 1909-10 Hubert Parry's From Death to Life 1914 John Ireland's Mai Dun 1921 and Frank Bridge's orchestral poems 1903-15 **PARRY BEFORE JERUSALEM** BERNARD BENOLIEL, 2018 [Vaughan Williams Essays](#) Robin Wells, 2017-07-05 Serious scholarship on the music of Ralph Vaughan Williams is currently enjoying a lively revival after a period of relative quiescence and is only beginning to address the

enduring affection of concert audiences for his music The essays that comprise this volume extend the study of Vaughan Williams's music in new directions that will be of interest to scholars, performers and listeners alike. This volume contains the work of eleven North American scholars who have been recipients of the Ralph Vaughan Williams Fellowship based at the composer's own school Charterhouse which was created and has been supported by the Carthusian Trust since 1985. This wide ranging and detailed collection of essays covers the spectrum of genres in which Vaughan Williams wrote including dance, symphony, opera, song, hymnody and film music. The contributors also employ a range of analytical and historical methods of investigation to illuminate aspects of Vaughan Williams's compositional techniques and influences, musical, literary and visual.

British Music and Literary Context Michael Allis, 2012 Despite several recent monographs, editions and recordings devoted to the reassessment of British music in the late nineteenth and early twentieth century, some negative perceptions still remain particularly a sense that British composers in this period somehow lacked literary credentials. British Music and Literary Context counters this perception by showing that these composers displayed a real confidence and assurance in refiguring literary texts in their music. The book explores how a literary context might offer modern audiences and listeners a way in to appreciate specific works that have traditionally been viewed as problematic. Each chapter of this interdisciplinary study juxtaposes a British composer with a particular literary counterpart or genre. Issues highlighted in the book include the vexed relationship between words and music, the refiguring of literary narratives as musical structures and the ways in which musical settings or representations of literary texts might be seen as critical readings of those texts. Anyone interested in nineteenth century British music, literature and Victorian studies will enjoy this thought provoking and perceptive book.

Parry's Creative Process Michael Allis, 2003 Of the several unfortunate images surrounding the composer Hubert Parry 1848-1918 some of the most damaging are those connected with his approach to composition itself. In particular it has been suggested that Parry possessed a great facility and that consequently he was not critical about the pieces which he composed.

The Parrys of the Golden Vale Anthony Boden, 1998 **A History of the County of Sussex V. II** C. P.

Lewis, 2009 The Littlehampton volume focuses on 12 parishes with particular emphasis on seaside development from the 18th century onwards. Covers the parishes of Angmering, Burpham, Ferring, Goring, Kingston, Littlehampton, Lymminster, Poling, East Preston, Rustington, North Stoke and Warningcamp assessing their history from the earliest times to the present day. There is a particular emphasis on seaside coastal development from the eighteenth century onwards.

Visual Words Gerard Curtis, 2019-07-16 First Published in 2002 Visual Words provides a unique and interdisciplinary evaluation of the relationship between images and words in this period. Victorian England witnessed a remarkable growth in literacy, culminating in the new literary nationalism that emerged at the beginning of the twentieth century. Each chapter explores a different aspect of this relationship: the role of Dickens as the heroic author; the book as an iconic object; the growing graphic presence of the text; the role of the graphic trace; the Sister Arts pen and pencil tradition; and the competition between image

and word as systems of communication Examining the impact of such diverse areas as advertising graphic illustration narrative painting frontispiece portraits bibliomania and the merchandising of literary culture Visual Words shows that the influence of the Sister Arts tradition was more widespread and complex than has previously been considered Whether discussing portraits of authors the uses of iconography in Ford Madox Brown's painting *Work* or examining why the British Library was equipped with false bookcases for doors Gerard Curtis looks at artistic and literary culture from an art historical and object perspective to gain a better understanding of why some Victorians called their culture hieroglyphic [Parry Before Jerusalem](#) Bernard Benoliel, 2020-02-03 First published in 1997 this volume demonstrates that through his activities as a composer historian lecturer and administrator Sir Hubert Parry 1848-1918 played a significant role in British music during the latter half of the nineteenth century Yet despite his achievements this century has for the most part neglected both Parry's writings and his compositions his name is remembered by the general public for one work alone *Jerusalem* In this collection of essays Bernard Benoliel examines some of the reasons for this neglect and reassesses some of Parry's most important works These essays show that it was due to the large number and diversity of his public engagements both social and work related that Parry's musical achievements did not often reach the heights of creative genius of which he might otherwise have been capable By examining Parry's personal relationships with his family and in particular with his wife Maude Benoliel reveals an immensely complex personality a man whose private and public selves were very much shaped by the society in which he lived The book concludes with a selection of Parry's own published writings with introductions by the author
