Supreme Court, 1995      **Crime and Culture in America** Parviz Saney, 1986-11-07 Saney cogently argues that in the absence of adequate support within social and legal norms a heavy burden is placed upon the criminal justice system a burden that it cannot carry Criminal law and the courts fail to provide for either swiftness or certainty of punishment police have failed to overcome the basic American distrust of authority to gain the comparable support enjoyed by police in other countries and the penal system operates under contradictory goals isolated from public view or support The final chapter presents a succinct set of proposals for changing the justice system to one that would be humane and more just Choice This thought provoking study of the crime problem in America provides an in depth look at the sociological forces that are dominant in today s society and examines the possible influence of certain contemporary values and perceptions on criminal activity the quality of justice in the American courts and the attitude of the general public The author discusses the various factors that can affect or encourage criminal behavior and relates these directly to the way

people feel and respond to the incidence of crime and its punishment and to a growing lack of confidence in the criminal justice system Crime in America is first presented in a factual context followed by a discussion of its cultural influences and finally with a consideration of its criminal law aspects
