*The Private Roots of Public Action* Nancy Burns, Kay Lehman Schlozman, Sidney Verba, 2001 Why after several generations of suffrage and a revival of the women s movement in the late 1960s do women continue to be less politically active than men Why are they less likely to seek public office or join political organizations The Private Roots of Public Action is the most comprehensive study of this puzzle of unequal participation The authors develop new methods to trace gender differences in political activity to the nonpolitical institutions of everyday life the family school workplace nonpolitical voluntary association and church Different experiences with these institutions produce differences in the resources skills and political orientations that facilitate participation with a cumulative advantage for men In addition part of the solution to the puzzle of unequal participation lies in politics itself where women hold visible public office women citizens are more politically interested and active The model that explains gender differences in participation is sufficiently general to apply to participatory disparities among other groups among the young the middle aged and the elderly or among Latinos African Americans and Anglo Whites

Guerrero,2024-08-19 Democracy is in trouble What is going wrong What should we do Lottocracy argues that perhaps surprisingly the problem is with the heart of modern democracy the election Elections are failing as accountability mechanisms Elections provide powerful short term incentives leading elected politicians to downplay long term catastrophic concerns Elections create division where none need exist The most powerful among us take advantage of this to control who is elected what policies are enacted and which problems are ignored Policy complexity citizen ignorance elite capture and manipulation algorithmically reinforced echo chambers intensifying partisan division and distrust and the dissolution of political community combine to render modern electoral democracies incapable of helping us solve the urgent problems we face What should we do Alexander Guerrero takes seriously the possibility that although electoral democracy has been better than all systems that have been tried the basic mechanism at its core the election is broken and unworkable under modern political conditions Lottocracy moves past the Churchillian shrug the worst system except for all the others introducing a new form of democracy lottocracy Lottocratic systems include many new elements but the most striking is the shift from using elected representatives to using representatives selected through lottery Guerrero introduces and discusses lottocratic systems their potential advantages and potential concerns The argument engages with foundational philosophical questions considering how rights of political participation political equality political power considerations of accountability and legitimacy and the nature of democracy itself are illuminated and reconfigured once we move past the electoral representative framework
