Partnering for the Environment Eric C. Poncelet, 2004-02-10 Environmental policy domains are increasingly adopting strategies of cooperation over those of conflict Decision making processes founded upon collaboration and public participation are receiving more attention and favor and in turn engendering multistakeholder environmental partnerships In his thoughtful analysis Eric C Poncelet seeks to illuminate the mechanics of these partnerships especially at the level of social interaction Drawing on ethnographic research performed with four case study partnerships in the European Union and the United States Poncelet focuses on the diverging ways that stakeholders think talk and conventionally act with regard to the environmental issues at stake Also explored are the roles of environmental partnerships as sites of personal transformation where participants and their perspectives conceptualizations and expectations can and do change Partnering for the Environment concludes by examining the broader implications of multistakeholder partnerships for the future of environmental decision making and suggests ways by which these partnerships may be more effectively used and managed

Gaines V. White River Environmental Partnership ,2000      *The Trans-Pacific Partnership and Canada* Scott Sinclair, Stuart Trew, 2016-10-01 The Trans Pacific Partnership with its twelve participating countries on three continents is the largest regional trade and investment agreement that Canada has ever negotiated It is also one of the most controversial for good reason Negotiations ended exactly a year ago in October 2015 and the TPP was signed in New Zealand in February 2016 But there is no guarantee it will ever come into effect Opposition to the TPP is strongest in the United States where both 2016 presidential nominees vowed to kill or significantly renegotiate the deal Outgoing President Barack Obama characterized the TPP as a Made in America deal in the hope of getting it passed into law shortly after the November presidential election But is what is good for corporate America good for Canada In this book experts in a dozen policy areas explain what the impact of the TPP agreement would be on Canada Many of the key issues they explore have received little media coverage notably the effect of the TPP on environmental protection health care and other public services Canada s cultural industries the labour market human rights and the democratic decision making process generally Perhaps most controversially the TPP would expand the rights of multinational corporations to sue governments for policies and decisions that interfere with their profits Most public commentary on the TPP in Canada has come from CEOs and business lobbyists with a vested interest in furthering a free trade model that impoverishes democracy and weakens our ability to shape public interest regulation The expert contributors to this book drawn from academia the labour movement and NGO world offer an independent and nuanced account of the real but underreported costs of the TPP      *The Trans-Pacific Partnership* Matthew Rimmer, 2020-12-25 This book considers the impact of the Trans Pacific Partnership TPP on intellectual property and trade The book focuses upon the debate over copyright law intermediary liability and technological protection measures The text examines the negotiations over trade mark law cybersquatting geographical indications and the plain packaging of tobacco

**Partnership and Leadership** T. de Bruijn,Arnold Tukker,2013-10-14 Sustainable development has become a central perspective in environmental strategies around the world It is clear that neither governments nor businesses have the capability to bring about sustainability on their own Therefore collaboration has emerged as a central concept At the same time it is obvious that someone has to take the lead in the development towards sustainability This book focuses on different forms of collaboration emerging between various actors The objective of the book is to more systematically explore the different roles and relationships between partnership and leadership Basically both partnership and leadership can be seen in a positive and negative way for example as far as

partnership is concerned we can assume that the path towards sustainability can be paved by parties coming together taking some initiative collaborating On the opposite partnership and consensus based decisions can be seen as an obstacle to foster radical changes in production and consumption patterns Similarly leadership can be seen as an obstacle to sustainable development if leaders form close circles and are not willing to share experiences with other actors but leadership could also be considered as an important element to keep concepts and practices forward The book holds this double perspective explaining mapping and analyzing different goals formats methods of more and less collaborative approaches but at the same time taking a critical approach to the theme by understanding related risks effects prospects and corrective actions Next to a conceptual part the book brings together case studies from around the world The focus is in describing and understanding various formats of collaboration and critically evaluating its effects and prospects A concluding chapter discusses the role of partnership and leadership in realizing various levels of environmental innovations optimization and re design that usually affect only a small part of the production consumption structure and much more complicated radical innovations that have to deal with societal sub systems The book is in part an edited version of selected papers presented during the 1998 Greening of Industry Conference in Rome on the subject enriched with contributions of other invited authors The Silent Partner ,1922
