Managing Without Managers

Roberta Rubin Greene

Managing Without Managers:

Managing Without Managers Ricardo Semler, 1989-01-01 *Managing Without Managers* Shan Martin, 1983-04 A management consultant proposes an entirely original approach to the streamlining of public enterprise In her view workers with practical experience often know what needs to be done far better than managers She shows how management often fails in its role as source of ideas how management has grown disproportionately and how its power to make decisions has been eroded She proposes a new model in which the people who are responsible for the work are also the people who do it raises some provocative questions and presents some thoughtful arguments in support of the idea of eliminating some of the excessive layers of management in the public service American Political Science Review Vol 78 **Made Without Managers** Mayden Team, Alison Sturgess Durden, Chris May, Dr Philippa Kindon, 2023-01-19 Can we manage without managers Brought to life through the true stories of the real people who work there Made Without Managers shares one company's eye opening experiences of a different way of working Concerned that the constraints of conventional line management structures might stand in the way of exceptional innovation and unrivalled customer service the team at Mayden decided to break free from traditional approaches to people hierarchies and take a liberating exciting and sometimes rocky journey into the extraordinary instead What they created was a successful dynamic future focused company that no longer relies on an outdated blueprint of traditional hierarchical management to get things done What they learned can benefit any business that's looking for more forward thinking ways of working ways that have the potential to unlock remarkable levels of empowerment creativity collaboration and productivity This authentic and compelling account provides an unprecedented opportunity to go behind closed doors and discover the truth about the realities of working in and running a self managing organisation directly from the people that have lived and worked through it themselves Learn about the pitfalls as well as the possibilities experience the struggles alongside the successes and shine a light on what it really takes to achieve prosper survive and thrive in a business that's made without managers *Management* Arthur G. pulled together under the new standard A focus on organization ethics places the standard into the workplace and shows that its successful implementation there requires the correct design of organization systems rather than an attempt to change the individual employees For corporate training programs and the creation of more ethical individuals in the workplace

Foundations of Social Work Practice in the Field of Aging Roberta Rubin Greene,2007 The aging of societies is a global phenomenon In the United States alone the life expectancy for both men and women will continue to increase over the next few decades and with that a population explosion of older adults The dramatic increase in the number and diversity of older adults elevates the visibility of gerontological matters As a result social work practice is becoming more multigenerational thereby demanding social workers regardless of their professional endeavors to be equipped with the most innovative theories and practices to serve older adults and their families This comprehensive text spans the new knowledge and skills required in direct practice areas group work and macro practice It also outlines the Geriatric Social Work Competencies as developed by social work educators necessary to serve the older adult population and suggests how these competencies can be integrated into foundation curriculum Social work educators students practitioners administrators and policymakers will find updated useful information in this text regarding assessment tools cultural influences evidence based practices intervention techniques theoretical examples Individuals are living longer and healthier lives in part because of the extraordinary growth of biomedical knowledge and public health initiatives The confluence of the rapid and large increase of the older population and the exponential increase in the dissemination of knowledge create an imperative for social workers to employ the most recent knowledge in their practice with people living increasingly long lives JoAnn Damron Rodriguez Department of Social Welfare University of California Los Angeles
