level of knowledge and understanding to manage the risks associated with an electrical system. In achieving this aim, the Code of Practice has the following objectives:

- To provide the good practice practical guidance in the form of a self assessment so that the user can follow a systematic approach to understanding the management of various aspects of an electrical system for their organisation.
- For the guidance to be understood and usable by a broad range of individuals, technical and non technical disciplines.
- To enable the end user to create and implement an effective electrical safety management system where nothing is currently in place or to enhance an existing system.

The Code of Practice is applicable to the buildings, facilities, equipment and environments associated with a wide range of organisations, irrespective of size, which includes the industrial, commercial and the public sectors. Example areas include Central and Local Government premises, Educational buildings and campuses, Emergency services premises, Healthcare establishments and estates, Leisure, Hotel and Catering, Manufacturing, Industrial, Construction, Warehousing and Distribution, Offices, Residential property management, Retail premises, Transport, Ports and Terminals, Utilities.
