Managing For Results:

Managing For Results Peter Drucker, 2012-09-10 *Managing for Results* demonstrates Drucker's particular genius for breaking through conventional outlooks and opening up new perspectives for ultimate profits in the world of business. What must be done to make the organization perform, prosper and grow? What the executive, the maker of decisions must do to move the enterprise forward is the subject of this book. It will be of great value to students of management as well as executives in industry and commerce and it deals skilfully and perceptively with economic tasks which every business has to tackle in order to achieve sound performance and economic results.

Managing for Results Peter Ferdinand Drucker, 1989 This is a general guide to techniques of good management. The author has written numerous books including *The Practice of Management*, *The Future of Industrial Man* and *Managing in Turbulent Times*. *Managing for Results* Peter Ferdinand Drucker, 1964

Managing for Results Peter Ferdinand Drucker, 1967 **Managing for Results, 2005** John M. Kamensky, Albert Morales, 2005 The managing for results movement that began in the early 1990s has now reached adolescence and is creating new challenges for government managers. After spending years creating planning and performance measuring systems, managers and policy makers now need to focus on how to use performance information to make data driven decisions. *Managing Results for 2005* describes through a series of case studies the progress being made in federal, state and local governments in managing for results. Part I increases our understanding about the potential use of performance information in government. It starts with a chapter on how government leaders can overcome obstacles to using performance information. Another chapter presents a comprehensive framework for tying performance to the budget process. The book provides specific examples of how performance information has been used to dramatically improve program outcomes. Part II presents case studies on the use of performance information to improve results in a range of federal agencies in Texas, state government and in the City of Baltimore. As pioneering efforts, these examples do not all present success stories; nevertheless, the lessons learned will be instructive to public managers as the managing for results movement advances toward maturity.
