Many hospitals and health care organizations that were independent freestanding institutions are now part of large health systems that deliver patient care in a variety of inpatient ambulatory and community settings. Vast changes in the U.S. health care system are reshaping how librarians provide services to physicians and other patient caregivers as well as to medical and allied health sciences students and faculty. Twenty one experts have contributed to this groundbreaking text. Their individual chapters offer specific practical advice on administrative issues, planning and marketing, financial management, space planning, collection development, cataloging and classification, document delivery, audiovisual services, every aspect of managing today's ever changing health care library. Required reading for any librarian offering health care information to professionals, faculty or consumers.

This book is a guide for reforming healthcare delivery. The way we organize care matters and the people best positioned to drive this are the clinicians who deliver care. The book offers a framework for transforming healthcare delivery that covers operational design, change management, long term learning, and organizational environment. It describes the work of leading local operational change, identifies key decisions to be made, actions to be taken, and factors that must be taken into account, and gives clinicians the tools and perspectives they need to lead change. The challenge of modern healthcare is to develop better organizations capable of delivering compassionate and individualized care on a grand scale while preserving the personal relationship between clinician and patient and the quality of care at the ward, operating room, clinic or practice. Informed by extensive research and experience with systems all over the world, Richard Bohmer shows how organizations may transform by deploying a new workforce of clinical change leaders and how clinicians can take greater control over their own working environments.
