Managing Multinational Corporations Arvind V. Phatak, 1974 The nature of the strategic decisions and the basic managerial functions of planning organizing staffing and controlling which serve as the framework for making these decisions is the focus of this book Global Reach for Gold Mondy Selle Gold, 2018-10-15 Presently he is a professor of management at Fort Hays State University and an adjunct professor at Colorado State University Global He has served as a professor of management at Shenyang Normal University China a professor of international business at Keimyung University South Korea and a professor of accounting and finance at Monarch Business School Switzerland He has also taught at Northcentral University and University of Phoenix *Functioning of the Multinational Corporation* Anant R. Negandhi, 2013-10-22 Functioning of the Multinational Corporation A Global Comparative Study is a collection of papers that discusses the roles played by multinational corporation in addressing societal problems The title outlines and analyzes the issues and conflicts between multinational corporations and states The text first covers the concept of multinational corporations Next the selection tackles global issues such as economic independence socio cultural impact of transnational enterprises and transfer pricing problems The text also deals with strategies policy making and organizational adaptability of multinational corporations In the last part the title analyzes the individuals who manage multinational corporations in terms of their backgrounds education training and outlook The book will be of great interest to sociologists political scientists economists and behavioral scientists *Strategic Management in Multinational Companies* Yves L. Doz, 1986 Based on extensive research in major multinational corporations this book analyses the types of strategic choices and organisational capabilities that underlie the success or explain the failure of multinationals in trading off needs for national responsiveness to market diversity and host government policies and needs for international integration into a centrally managed production system and logistic network of operations in various countries *Managing the Embedded Multinational* Mats Forsgren, Ulf Holm, Jan Johanson, 2007-01-01 This monograph is based on an extensive dataset and a very well documented case study Such a wealth of empirical material provides an ideal ground to test theories and enables the authors to elaborate interesting conceptualisations of some specific aspects of the broader network approach particularly concerning the internationalisation of business networks Anna Spadavecchia Business History Combined with recent advances in network analysis the book can be instrumental in advancing our understanding which will not only be useful for research scholars but also provide practical guidance for managers It is full of ideas which seem like deceptively simple black stones that in the hands of a skillful artisan can be turned into dazzling diamonds Charles Dhanaraj Journal of International Business Studies The work by Forsgren et al offers a major contribution in terms of the analytical power of network relationships By shifting to an exchange based perspective they challenge the classical view of organizational power and control but also the sources of organizational capabilities They argue that the distinct capabilities and resources of the organization are developed through relationships

and connections Wilhelm Barner Rasmussen Rebecca Piekkari Joanna Scott Kennel and Catherine Welch Academy of Management Perspectives An interesting and insightful book It questions a lot of traditional thinking about international firms and the way they operate Throughout the book the reader is invited to develop a different perspective This perspective might be called a relationships and networks theory of the firm While this may sound familiar the book goes well beyond anything I have seen in the existing literature in terms of conceptualizing relationships and networks and in using this perspective to guide and interpret case study and survey research results William G Egelhoff Fordham University US It is now well accepted in the academic literature that the multinational corporation can be usefully modelled as a network of relationships But it is less well known that the origins of this perspective can be traced back to work done in Uppsala Sweden in the 1970s and 1980s The term business network was first used there and many important ideas around power and influence have also emerged from this research centre In this new book three of the key members of the Uppsala school develop a synthesis of the more recent ideas to come out of their research on networks By focusing on the concept of the embedded multinational they show how the internal networks of the multinational interact with the web of external networks each subsidiary unit has in its local market This book provides a definitive and compelling point of view of the importance of networking thinking to the study of the multinational corporation It is an important book and it will be widely cited in years to come Julian Birkinshaw London Business School UK Forsgren Holm and Johanson have been among the leaders in developing the idea of the multinational firm as a network that spans different country environments This perspective cautions the easy prescription that a multinational firm can do everything easily if it just has the right organizational form Relationships matter as do the legitimacy of the firm in the context of its foreign investments This book provides rich case insights into these dimensions Bruce Kogut INSEAD France This book expands the business network view on managerial issues in multinational corporations Specifically it scrutinises the importance of a subsidiary's external and internal business network for its strategic and organizational role within the corporation The internationalisation of firms in terms of management issues and headquarters control the influence of subsidiaries on decisions and learning processes within multinational corporations are examined in detail It is argued that
