Managing Projects with Make Steve Talbot, 1990 Managing Projects Alexander Berger, 2011-06 Seminar paper from the year 2009 in the subject Business economics Business Management Corporate Governance grade 65% University of Sunderland language English abstract Project Management is all about planning organizing and managing the resources in order to have a successful completion of specific project goals and objectives Every project is unique and the conditions affecting planning and implementation are different every time The starting and a finishing date are clearly determined before the project is executed This report describes the important figures who take place in the project such as the project manager PM and his team as well as describing project tools and steps which are necessary to take to execute the project

properly The PM is responsible for the overall success of the project He has the responsibility of the planning execution and closing of the project He sets up a team which he will lead throughout the project The team consists of experts who fulfill the requirements to execute the project successfully Furthermore planning is an important part which relates to the use of schedules such as a Work Breakdown Structure to plan and subsequently report progress within the project environment Referring to this the feasibility study will show if a project is technical and financial feasible and has to be done before a project starts Moreover cost is one of the three pillars supporting project success or failure the other two being schedule and performance A project that goes over budget will most common not achieve the goals of the project because stakeholder run simply out of money Therefore it is very important that cost are calculated and controlled during the project which is a part of the PM s duties During the project duration many risks and problems occur which could influence the quality and the cost of the project in a positive or negative way Therefore it is important to determine all possible risks as ea

Managing Projects in the Creative Industries Julie Bérubé, Laureline Chiapello, Hélène Caron, 2025-12-23 This book offers a critical and transdisciplinary rethinking of project management in the creative industries Bridging theory and practice it explores how traditional approaches can be adapted enriched or challenged to better respond to the complex uncertain and value driven nature of contemporary creative work Each chapter explores project management theory through clearly articulated frameworks from major schools of thought referencing key scholarly contributions These theoretical discussions are complemented by real world examples from an experienced creative industries project manager creating a dialogue between academic rigor and practical relevance The text critically examines traditional project management assumptions offering conceptual resources to reimagine project management as a collaborative reflexive space for meaning making Drawing on provocative frameworks like the Scandinavian School and Making Projects Critical alongside insights from design and the social sciences it proposes integrative models that balance organizational efficiency with the unique values rhythms and processes inherent to creative practice The dual approach of theoretical depth paired with practitioner wisdom equips readers with both intellectual understanding and practical tools to navigate the complexities of managing innovative projects The result is a fresh perspective that honors the distinctive characteristics of creative work while maintaining necessary structure and direction Managing Projects in the Creative Industries is intended for researchers students project management professionals and practitioners in the cultural and creative industries who seek to enrich their practices challenge dominant norms and develop more human centered critical and context sensitive approaches
