Managing The Adoption Of New Technology:

Managing the Adoption of New Technology David Preece, 2018-03-29 Originally published in 1989 this book gives an overview of the empirical work on new technology objectives together with an analysis of management strategies for adoption at the corporate technological and people levels. It also reviews previous work on the extent to which staff at different levels and from different specialisms are involved in decision making as well as the adoption process more generally. The book looks at different approaches to analysing organizational contexts and provides a framework for studying the stages of the adoption process. The book includes case studies two in financial services and two in engineering contexts.

Managing the Adoption of New Technology David A. Preece, Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy Joy E. Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted. Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data. On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data. However there were some academic papers which used mixed methodology because of the nature of the study. Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique. Mostly there is no general argument leading from one contribution to the next. However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth. With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic. Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors. Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new

strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation. With regard to technology and big data impact on organisational performance it was evident that system performance, memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance. Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness. Target audience: The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics, information management, business education, development studies, social sciences and technology. It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment.

Applications of Multi-Criteria and Game Theory Approaches Lyes Benyoucef, Jean-Claude Hennet, Manoj Kumar Tiwari, 2013-10-17. Aligning the latest practices, innovations and case studies with academic frameworks and theories, the broad area of multi criteria and game theory applications in manufacturing and logistics is covered in comprehensive detail. Divided into two parts, Part I is dedicated to multi criteria applications and includes chapters on logistics with a focus on vehicle routing problems, a multi objective decision making approach to select the best storage policy and an exploratory study to predict the most important factors that can lead to successful mobile supply chain management adoption for manufacturing firms. Part II covers game theory applications and encompasses the process of forming a coalition within a corporate network to the problem of integrating inventory and distribution optimization together with game theory to effectively manage supply networks.

Providing a forum to investigate exchange novel ideas and disseminate knowledge covering the broad area of multi criteria and game theory applications in manufacturing and logistics Applications of Multi Criteria and Game Theory Approaches is an excellent reference for students researchers but also managers and industry professionals working with manufacturing and logistics issues **Technology Management 1** Tarek M.
