Migrants And Identity In Japan And Brazil The Nikkeijin:

Migrants and Identity in Japan and Brazil Daniela de Carvalho, 2003-08-27 Economic and social difficulties at the beginning of the 20th century caused many Japanese to emigrate to Brazil. The situation was reversed in the 1980s as a result of economic downturn in Brazil and labour shortages in Japan. This book examines the construction and reconstruction of the ethnic identities of people of Japanese descent firstly in the process of emigration to Brazil up to the 1980s and secondly in the process of return migration to Japan in the 1990s. The closed nature of Japan's social history means that the effect of return migration can clearly be seen. Japan is to some extent a unique sociological specimen owing to the absence of any tradition of receiving immigrants. This book is first of all about migration but also covers the important related issues of ethnic identity and the construction of ethnic communities. It addresses the issues from the dual perspective of Japan and Brazil. The findings suggest that mutual contact has led neither to a state of conflict nor to one of peaceful coexistence but rather to an assertion of difference. It is argued that the Nikkeijin consent strategically to the social definitions imposed upon their identities and that the issue of the Nikkeijin presence is closely related to the emerging diversity of Japanese society.

Searching for Home Abroad Jeffrey Lesser, 2003-09-15 A multidisciplinary study of the transnational cultural identity of Brazilian nationals of Japanese descent and their more recent attempts to re-settle in Japan. *Transnational Faiths* Hugo Córdova Quero, Rafael Shoji, 2016-02-17 Japan has witnessed the arrival of thousands of immigrants since the 1990s from Latin America especially from Brazil and Peru. Along with immigrants from other parts of the world they all express the new face of Japan one of multiculturalism and multi-ethnicity. Newcomers are having a strong impact in local faith communities and playing an unexpected role in the development of communities. This book focuses on the role that faith and religious institutions play in the migrants' process of settlement and integration. The authors also focus on the impact of immigrants' religiosity amidst religious groups formerly established in Japan. Religion is an integral aspect of the displacement and settlement process of immigrants in an increasingly multi-ethnic, multicultural and pluri-religious contemporary Japan. Religious institutions and their social networks in Japan are becoming the first point of contact among immigrants. This book exposes and explores the often missed connection of the positive role of religion and faith-based communities in facilitating varied integrative ways of belonging for immigrants. The authors highlight the faith experiences of immigrants themselves by bringing their voices through case studies, interviews and ethnographic research throughout the book to offer an important contribution to the exploration of multiculturalism in Japan. *Diaspora and Identity* Mieko Nishida, 2017-11-30 São Paulo, Brazil holds the largest number of Japanese descendants outside Japan and they have been there for six generations. Japanese immigration to Brazil started in 1908 to replace European immigrants to work in São Paulo's expanding coffee industry. It peaked in the late 1920s and early 1930s as anti-Japanese sentiment grew in Brazil. Approximately 189,000 Japanese entered Brazil by 1942 in mandatory family units. After the war, pre-war immigrants and their descendants became quickly

concentrated in S o Paulo City Immigration from Japan resumed in 1952 and by 1993 some 54 000 immigrants arrived in Brazil By 1980 the majority of Japanese Brazilians had joined the urban middle class and many had been mixed racially In the mid 1980s Japanese Brazilians return labor migrations to Japan began on a large scale More than 310 000 Brazilian citizens were residing in Japan in June 2008 when the centenary of Japanese immigration was widely celebrated in Brazil The story does not end there The global recession that started in 2008 soon forced unemployed Brazilians in Japan and their Japanese born children to return to Brazil Based on her research in Brazil and Japan Mieko Nishida challenges the essentialized categories of the Japanese in Brazil and Brazilians in Japan with special emphasis on gender Nishida deftly argues that Japanese Brazilian identity has never been a static fixed set of traits that can be counted and inventoried Rather it is about being and becoming a process of identity in motion responding to the push and pull between being positioned and positioning in a historically changing world She examines Japanese immigrants and their descendants historically shifting sense of identity which comes from their experiences of historical changes in socioeconomic and political structure in both Brazil and Japan Each chapter illustrates how their identity is perpetually in formation across generation across gender across class across race and in the movement of people between nations Diaspora and Identity makes an important contribution to the understanding of the historical development of ethnic racial and national identities as well as construction of the Japanese diaspora in Brazil and its response to time place and circumstances

Strangers in the Ethnic Homeland Takeyuki Tsuda, 2003 With an immigrant population currently estimated at roughly 280 000 Japanese Brazilians are now the second largest group of foreigners in Japan Although they are of Japanese descent most were born in Brazil and are culturally Brazilian As a result they have become Japan s newest ethnic minority Drawing upon close to two years of multisite fieldwork in Brazil and Japan Takeyuki Tsuda has written a comprehensive ethnography that examines the ethnic experiences and reactions of both Japanese Brazilian immigrants and their native Japanese hosts

Latin Americans of Japanese Origin (Nikkeijin) Working in Japan Jun'ichi Gotō, 2007 Since the revision of the Japanese immigration law in 1990 there has been a dramatic influx of Latin Americans mostly Brazilians of Japanese origin Nikkeijin working in Japan This is because the revision has basically allowed Nikkeijin to enter Japan legally even as unskilled workers while the Japanese law in principle prohibits foreigners from taking unskilled jobs in the country In response the number of these Latin American migrants has increased from practically zero to more than 250 000 The migration of Nikkeijin is likely to have a significant impact on both the Brazilian and the Japanese economies given the substantial amount of remittances they send to Brazil The impact is likely to be felt especially in the Nikkeijin community in Brazil In spite of their importance the detailed characteristics of Nikkei migrants and the prospect for future migration and remittances are under researched The purpose of this paper is therefore to provide a more comprehensive account of the migration of Nikkeijin workers to Japan The paper contains a brief review of the history of Japanese emigration to Latin America mostly Brazil a study of the characteristics of Nikkeijin workers in Japan

and their current living conditions and a discussion on trends and issues regarding immigration in Japan and migration policy The final part of the paper briefly notes the limitation of existing studies and describes the Brazil Nikkei Household Survey which is being conducted by the World Bank's Development Research Group at the time of writing this paper The availability of the survey data will contribute to a better understanding of the Japan Brazil migration and remittance corridor

Brokered Homeland Joshua Hotaka Roth, 2002 Faced with an aging workforce Japanese firms are hiring foreign workers in ever increasing numbers In 1990 Japan's government began encouraging the migration of Nikkeijin overseas Japanese who are presumed to assimilate more easily than are foreign nationals without a Japanese connection More than 250 000 Nikkeijin mainly from Brazil now work in Japan The interactions between Nikkeijin and natives says Joshua Hotaka Roth play a significant role in the emergence of an increasingly multicultural Japan He uses the experiences of Japanese Brazilians in Japan to illuminate the racial cultural linguistic and other criteria groups use to distinguish themselves from one another Roth's analysis is enriched by on site observations at festivals in factories and in community centers as well as by interviews with workers managers employment brokers and government officials Considered both essentially Japanese and foreign nikkeijin benefit from preferential immigration policy yet face economic and political strictures that marginalize them socially and deny them membership in local communities Although the literature on immigration tends to blame native blue collar workers for tense relations with migrants Roth makes a compelling case for a more complex definition of the relationships among class nativism and foreign labor *Brokered Homeland* is enlivened by Roth's own experience in Japan he came to think of himself as nikkeijin rather than as Japanese American

Brazilian Immigration and the Quest for Identity Catarina Fritz, 2011 This book is a detailed study of the lives of a group of young Brazilians living in the greater Boston area the majority of whom entered the country illegally It explores the extent to which their origins in a more racially fluid environment affects their adaptation to a society with a much more rigid form of racial categorization In what ways does their adaptation to the racial hierarchy influence their lives in the United States and how their varying ancestry and legal status impact this process The book provides further insight into the debate about post racialism and the changing dyn
