## Parallel Unrealities:

*Parallel Unrealities* Wayne Maiewski, 2004-10 PARALLEL UNREALITIES is the first book written by Wayne Maiewski. It covers a wealth of poetic subjects and styles. Some of the creations date back to his formative years as a long-haired, free-spirited teen during the tumultuous 1970s. Others are of more recent vintage, with the rest of the collection scattered somewhere in between. The book is divided into seven sections, though there is no specific chronology to the poems themselves. Many of them were originally written as song lyrics. Humor is the one common theme that permeates the work, yet many individual creations are imbued with a deep philosophical insight into the human psyche. This book should not merely be read; it should be savored wholeheartedly.

**Haunting Futures** Marek Pawlak, 2024-12-01 The 2008 economic collapse in Iceland sent its residents into a destabilizing crisis with far-reaching temporal and affective consequences. *Haunting Futures* explores how the complex relationships of this unstable past and the anticipatory modes of the ongoing present keep Icelanders and the Polish migrant community in their midst alert to looming futures in crisis. It offers insights into timely crisis-ridden impacts and imaginings, migration processes, and social understandings and practices. Through its attention to how people engage with crisis temporally and affectively, the book presents the crisis not simply as an isolated and distressing event but as a spectre embodied in time through ongoing anticipation.

**The Unreality Industry** Ian I. Mitroff, Warren G. Bennis, 1993 Fortells the trend that mass media outlets are helping to blur the line between reality and fantasy.

**The Quantum and the Lotus** Matthieu Ricard, Trinh Xuan Thuan, 2004-10-26 Matthieu Ricard trained as a molecular biologist working in the lab of a Nobel prize-winning scientist, but when he read some Buddhist philosophy, he became drawn to Buddhism. Eventually, he left his life in science to study with Tibetan teachers and he is now a Buddhist monk and translator for the Dalai Lama, living in the Shechen monastery near Kathmandu in Nepal. Trinh Thuan was born into a Buddhist family in Vietnam but became intrigued by the explosion of discoveries in astronomy during the 1960s. He made his way to the prestigious California Institute of Technology to study with some of the biggest names in the field and is now an acclaimed astrophysicist and specialist on how the galaxies formed. When Matthieu Ricard and Trinh Thuan met at an academic conference in the summer of 1997, they began discussing the many remarkable connections between the teachings of Buddhism and the findings of recent science. That conversation grew into an astonishing correspondence exploring a series of fascinating questions: Did the universe have a beginning? Or is our universe one in a series of infinite universes with no end and no beginning? Is the concept of a beginning of time fundamentally flawed? Might our perception of time in fact be an illusion, a phenomenon created in our brains that has no ultimate reality? Is the stunning fine tuning of the universe which has produced just the right conditions for life to evolve a sign that a principle of creation is at work in our world? If such a principle of creation undergirds the workings of the universe, what does that tell us about whether or not there is a divine Creator? How does the radical interpretation of reality offered by quantum physics conform to and yet differ from the

Buddhist conception of reality What is consciousness and how did it evolve Can consciousness exist apart from a brain generating it The stimulating journey of discovery the authors traveled in their discussions is re created beautifully in The Quantum and the Lotus written in the style of a lively dialogue between friends Both the fundamental teachings of Buddhism and the discoveries of contemporary science are introduced with great clarity and the reader will be profoundly impressed by the many correspondences between the two streams of thought and revelation Through the course of their dialogue the authors reach a remarkable meeting of minds ultimately offering a vital new understanding of the many ways in which science and Buddhism confirm and complement each other and of the ways in which as Matthieu Ricard writes knowledge of our spirits and knowledge of the world are mutually enlightening and empowering The Quantum and the Lotus is a mind expanding eye opening exploration of the exciting parallels between cutting edge thinking in physics and Buddhism a scintillating conversation any thinking person would delight in overhearing Daniel Goleman author of Emotional Intelligence The Quantum and the Lotus is the rich and inspiring result of a deeply interesting dialogue between Western science and Buddhist philosophy This remarkable book will contribute greatly to a better understanding of the true nature of our world and the way we live our lives His Holiness the Dalai Lama
