ancient and modern records in medical science sports anthropology the arts psychical research comparative religious studies and dozens of other disciplines Murphy has created an encyclopedia of exceptional functioning of body mind and spirit He paints a broad and convincing picture of the possibilities of further evolutionary development of human attributes By studying metanormal abilities under a wide range of conditions Murphy suggests that we can identify those activities that typically evoke these capacities and assemble them into a coherent program of transformative practice A few of Murphy s central observations and proposal include The observation that cultural conditioning powerfully shapes or extinguishes metanormal capacities The proposition that we cannot comprehend our potentials for extraordinary life without an empirical approach that involves many fields of inquiry and different kinds of knowing The notion that a widespread realization of extraordinary capacities would constitute an evolutionary transcendence analogous to the rise of humankind from its primal ancestry The proposal that all or most instances of significant human development are produced by a limited number of identifiable activities such as disciplined self observation visualization of desired capacities and caring for others The idea that a balanced development of our various capacities is possible through integrated practices In The Future Of The Body Murphy states that such practices can carry forward Earth s evolutionary adventure and lead humanity to the next step in its development

**Advances in Parapsychological Research** ,1977      **Margins of Reality** Robert G. Jahn,Brenda J. Dunne,2009-04 WHAT HAS MODERN SCIENCE SWEPT UNDER THE RUG This pioneering work which sparked intense controversy when it was first published two decades ago suggests that modern science in the name of rigor and objectivity has arbitrarily excluded the role of consciousness in the establishment of physical reality Drawing on the results of their first decade of empirical experimentation and theoretical modeling in their Princeton Engineering Anomalies Research PEAR program the authors reach provocative conclusions about the interaction of human consciousness with physical devices information gathering processes and technological systems The scientific personal and social implications of this revolutionary work are staggering MARGINS OF REALITY is nothing less than a fundamental reevaluation of how the world really works
