Parental Loss Of A Child:

Parental Loss of a Child Therese A. Rando, 1986 Parental loss of a child is unlike any other loss The grief of parents is particularly severe complicated and long lasting with major and unparalleled symptom fluctuations over time Parental Loss of a Child investigates this specific and quite unique case of bereavement **Parent Grief** Paul C. Rosenblatt, 2016-02-04 Explores what couple and individual stories say and do not say about the child's dying and death and about parent grief The author uses narratives as his tool for the introduction and exploration of the many facets of parental grief *The Death of a Child* Elaine Stillwell, 2004 There is perhaps no more excruciating pain than the loss of a child It is a life changing event that will forever scar a parent When a child dies bereaved parents face the challenge of rebuilding their lives a daunting task that may often seem overwhelming The Death of a Child is filled with stories of people who have lost a child and how they dealt with the reality of that event This collection of life giving lessons touches on a wide range of emotions and situations that parents may encounter after the death of their child Chapter titles include Creating a New Normal Riding the Roller Coaster of Grief Cherishing the Seasons Singing Their Song **Surviving the Loss of a Child** Elizabeth B. Brown, 2010-03 Revised and updated this tender book offers encouragement and hope to those who may think they will never be able to get on with life after losing a child **After the Death of a Child** Ann K. Finkbeiner, 2012-12-11 For a parent losing a child is the most devastating event that can occur Most books on the subject focus on grieving and recovery but as most parents agree there is no recovery from such a loss This book examines the continued love parents feel for their child and the many poignant and ingenious ways they devise to preserve the bond Through detailed profiles of parents Ann Finkbeiner shows how new activities and changed relationships with their spouse friends and other children can all help parents preserve a bond with the lost child Based on extensive interviews and grief research Finkbeiner explains how parents have changed five to twenty five years after the deaths of their children The first half of the book discusses the short and long term effects of the child's death on the parent's relationships with the outside world that is with their spouses other children friends and relatives The second half of the book details the effect on the parents internal world their continuing sense of guilt their need to place the death in some larger context and their inability sometimes to consistently do so their new set of priorities the nature of their bond with the lost child and the subtle and creative ways they have of continuing that bond Finkbeiner's central point is not so much how parents grieve for their children but how they love them Refusing to fall back on pop jargon about recovery or to offer easy solutions or standardized timelines Finkbeiner's is a genuine and moving search to come to terms with loss Her complex profiles of parents resonate with the honesty and authenticity of uncomfortable emotions expressed and most importantly shared with others experiencing a similar loss Finally each profile exemplifies the many heroic ways parents learn to live with their pain and by so doing honor the lives their children should have lived *A Parent's Guide to Raising Grieving Children* Phyllis R. Silverman, Madelyn Kelly, 2009 When children lose someone they love life is never the same In

this sympathetic book the authors advocate an open honest approach suggesting that our instinctive desire to protect children from the reality of death may be more harmful than helpful
