## **Parks And Plates:**

Parks and Plates Robert J. Lillie, 2005 Many of our national parks monuments and seashores were established because of their inspiring geological features from the geysers of Yellowstone to the granite peaks of Yosemite A History of Southern Utah and its National Parks. [With plates.] Angus Munn WOODBURY, 1944 The Story Beneath the Scenery Robert Lillie, 2020-09-08 The picturesque mountains valleys and coastlines of our national parks result from processes occurring deep within the Earth The framework of plate tectonics helps us understand those processes and relate how park landscapes form the story beneath the scenery Dr Robert J Lillie draws on his experience as a geology professor park ranger and graphic illustrator to reveal plate tectonics in action His vivid photos and colorful graphics reveal the basics of Earth science in an easy to understand format Each chapter includes fun demonstrations food state quarters decks of cards to help readers appreciate park landscapes and the geological processes responsible for their formation The initial chapter introduces the reader to plate tectonics and its bearing on landforms and geological processes Subsequent chapters zoom in on park landscapes developed at the three types of plate boundaries and at hotspots The Story Beneath the Scenery helps readers appreciate how scenic wonders in many parks are similar because they developed in the same type of tectonic setting and why the landscapes in other parks are so different because they have a different tectonic origin *Beauty from the Beast* Robert Lillie, 2015-05-29 The same geological forces that threaten our lives with earthquakes and volcanic eruptions also nourish our spirits by forming spectacular mountains valleys and coastlines Dr Robert J Lillie relates this Beauty from the Beast story of the Pacific Northwest and surrounding regions by highlighting spectacular scenery in national state and local parklands Dr Lillie draws on his experience as a geology professor park ranger and graphic illustrator to reveal plate tectonics in action His vivid photos and color graphics reveal the basics of Earth science in an easy to understand format Each chapter includes fun demonstrations involving food state quarters decks of cards and other everyday objects to help readers appreciate the region s landscapes and the geological forces that created them The initial chapter introduces the reader to plate tectonics and its bearing on landforms earthquakes and volcanoes Subsequent chapters zoom in on landscapes at the three types of plate boundaries and a hotspot Beauty from the Beast reminds Northwest residents and visitors that their hometowns and iconic parklands are subject to geologic processes that affect their lives and livelihoods By learning to live with the beast of earthquakes tsunamis and volcanic eruptions they can more fully appreciate the beauty that surrounds them Preserving Wilderness in Our National Parks , 1971 **The National Parks Act** Canada, 1930 Parks Lebert Howard Weir, National Recreation Association, 1928 On Politics and Parks George Lambert Bristol, 2012-09-03 When George Bristol first saw the mountains surrounding East Glacier Montana in the early summer of 1961 he was in his own words awed to his depths Thus began a love affair with nature and public parks that has endured for more than fifty years This same love affair would lead Bristol to become a crusader for America s national parks and later to be largely

credited for the rescue of the ailing public park system in his home state In *On Politics and Parks* Bristol tells his own story in lively prose that includes many intriguing peeks at behind the scenes events in Washington Austin and elsewhere Beginning with his upbringing by a widowed young mother with a passion for music and literature he narrates the converging of influences that led him to an influential political career including active involvement in national campaigns for Lyndon B Johnson Hubert Humphrey Lloyd Bentsen and Jimmy Carter After working for the Democratic National Committee and Bill Clinton s 1992 presidential campaign Bristol was asked to join President Clinton s administration However what he really wanted was a place on the board of the National Park Foundation NPF With decades old images of Glacier still burning brightly in his memory he helped spearhead efforts to elevate the image of the National Park Service and helped establish a highly successful fundraising strategy for the NPF giving both organizations greater national awareness and stature Having acquired a well earned reputation for fundraising and effective advocacy Bristol soon began to do for his home state what he had done for the NPF solidify support and funding for the Texas park system Over ten years and five legislative sessions Bristol through the Texas Coalition for Conservation the nonprofit organization he founded fought for the full claim of Texas state parks to the sporting goods tax Utilizing his many contacts his well honed political sense and his dogged patience he forged an alliance that would win the day for everyone who loves the state s public lands In 2007 in the last bill passed on the last day of the session the Texas legislature nearly doubled the operating budget for parks *On Politics and Parks* is at once a lesson in conservation history and a captivating personal memoir that will inform entertain and inspire all those who share Bristol s love for the unspoiled beauty of the outdoors and his commitment to preserve that beauty for future generations To learn more about The Meadows Center for Water and the Environment sponsors of this book s series please click here
