Particle Size Distribution III, 1998 *Particle size distribution III*, 1998 **Handbook of Plastics Analysis** Hubert Lobo, Jose V. Bonilla, 2003-06-25 Plastics possess properties that have revolutionized the manufacture of products in the 20th century and beyond It remains critical to understand their behavior throughout their life cycle from manufacture to use and eventually to reclamation and disposal This volume highlights the most prominent tools in physical and chemical analysis techniques and applications A practical reference for performing measurements solving problems and investigating behavioral phenomena the editors advocate a phenomenological approach relying on case studies and illustrations to represent possible outcomes of each technique and presenting the basic governing equations where necessary *Particle Size Distribution III* Theodore Provder, 1998 Particle size and distribution are key factors in assessing polymer chains This volume examines a variety of recent measuring techniques including static and dynamic light scattering methods fractionation methods and electrophoretic and electroacoustic separation *Particle Size Distribution II* American Chemical Society. Meeting, 1991 Complementing ACS Symposium Series No 332 Particle Size Distribution this volume is a compendium of the current work in the field and features the latest technology now in use for particle size distribution assessment Among the new techniques discussed are capillary hydrodynamic fractionation field flow fractionation disc centrifuge photosedimentometry on line measurements fractals electrophoretic characterization image analysis and electric sensing zone A review chapter examines turbidimetry an old technique that has been revitalized with new mathematical approaches Of interest to coatings scientists colloid and surface chemists and polymer physical and analytical chemists

Drug Delivery Systems: Advanced Technologies Potentially Applicable in Personalised Treatment Jorge Coelho, 2013-03-15 This book is part of a series dedicated to recent advances on preventive predictive and personalised medicine PPPM It focuses on the theme of Drug delivery systems advanced technologies potentially applicable in personalised treatments The critical topics involving the development and preparation of effective drug delivery systems such as polymers available self assembly nanotechnology pharmaceutical formulations three dimensional structures molecular modeling tailor made solutions and technological tendencies are carefully discussed The understanding of these areas constitutes a paramount route to establish personalised and effective solutions for specific diseases and individuals
