**Partners in Science: Letters of James Watt & Joseph Black** James Watt,1970      *Edison's Concrete Piano* Judy  
Wearing,2009-10-31 Not even geniuses get it right the first time An entertaining look at the failures of great inventors  
Booklist To achieve great things you have to be willing to take risks and as Edison's Concrete Piano reveals some of the most  
famous names in history experienced plenty of flops and face plants in the course of their careers Thomas Edison for example  
not only revolutionized the world with the light bulb but also designed a concrete piano a nonoperational helicopter made  
from box kites and piano wire and a machine to speak to the dead Alexander Graham Bell inventor of the telephone actually  
devoted most of his time to his sheep farm in Nova Scotia devising a multi-nippled sheep somewhere along the way You'll  
also read about Leonardo da Vinci's walk on water shoes George Washington Carver's miracle peanut cure and much more  
The ludicrous ideas faulty designs and offbeat hobbies in this volume will inspire laughs and serve as a reminder that even  
the very best minds make mistakes Captivating This book is full of lessons for inventors and non-inventors alike Henry  
Petroski author of Success through Failure      *A Cognitive-Historical Approach to Creativity* Subrata Dasgupta,2019-03-20  
At the heart of creativity is the practice of bringing something new into existence whether it be a material object or abstract  
idea thereby making history and enriching the creative tradition A Cognitive Historical Approach to Creativity explores the  
idea that creativity is both a cognitive phenomenon and a historical process Blending insights and theories of cognitive  
science with the skills mentality and investigative tools of the historian this book considers diverse issues including the role  
of the unconscious in creativity the creative process creating history with a new object or idea and the relationship between  
creators and consumers Drawing on a plethora of real life examples from the eighteenth century through to the present day  
and from distinct fields including the arts literature science and engineering Subrata Dasgupta emphasizes historicity as a  
fundamental feature of creativity Providing a unified integrative interdisciplinary treatment of cognitive history and its  
application to understanding and explaining creativity in its multiple domains A Cognitive Historical Approach to Creativity is  
essential reading for all researchers of creativity      **The Industrial Revolution - Lost in Antiquity - Found in the  
Renaissance** Cort MacLean Johns Ph.D. - HSG,2021-03-15 Historians of Technology have failed to include the larger  
contribution and influence of Ctesibius compressor driven Hydraulis with its pneumatic pumps keyboard and organ pipes in  
the path of critical preparatory events leading up to the Latent Industrial Revolution One should also realize that Ctesibius

had all the parts and sub assemblies on hand to invent the first Steam Hydraulis or Calliope as illustrated on the front book cover of this work From the Fertile Crescent of the Persian Empire to the Hellenistic Library of Alexandria Vitruvius writing brought the Hydraulis to the Abbey of St Gall in 1414 during the Renaissance Its path then took it through Italy Germany and the Paris of Louis XIV along the Arch of Industrial Reawakening This was the Hydraulis 2 millennium path from Antiquity to its return reigniting the Latent Industrial Revolution

**Industrial Revolutions** Cort MacLean Johns,2021-05-23 With reference to artefactual archaeological evidence and surviving manuscript documentation of the Hydraulis I find that a new dialectical discussion might better analyze and address the underlying understanding of the Steam Engines longitudinal provenance and therefore requires a redefinition the origins of Industrial Revolutions themselves from Ctesibius to the exploration of Mars
