Child as Citizen

Giuliana Fenech,2025-08-15 Contributions by Daniela Brockdorff Nina Christensen Jill Coste Katrin Dautel Justyna Deszcz Tryhubczak Giuliana Fenech Naomi Hamer Irena Barbara Kalla Anne Klomberg Sonali Kulkarni Elizabeth Leach Leung Ann Marie Murnaghan Emily Murphy Emilie Owens Nicola Parker Patrycja Poniatowska Meg Rosoff and Farriba Schulz Child as Citizen Agency and Activism in Children s Literature and Culture addresses children s and young adult agency and activism across literature and culture demonstrating how these forces influence child citizenship Contributors to this volume highlight the agentic voices and activist practices that are growing across all spheres of young people s lives as well as the challenges to active citizenship that children

growing up in unjust sociopolitical contexts face. The volume is interdisciplinary and draws on the sociology of childhood, children's literature studies, youth culture studies, media technology and cultural studies, and Anthropocene ecofeminist and disability studies. Agency occurs in and around literature and storytelling, and this collection establishes how it is always influenced by identity as well as geopolitics. How it is both subjective and collective, how it is cultural and embodied, and how like citizenship it is not a static status but rather an ongoing negotiation. In this collection, contributors invite readers to consider agency as a system of relations between children themselves, between children and adults, children and institutions, and children and nation states, as well as between children and the nonhuman. This book reviews the interconnectedness between these relationships and attempts to untangle some of the complications that emerge.

How to Publish Academic Books: A Guide to Publishing Monographs, Edited Volumes, Textbooks, and Theses

Nitin Liladhar Rane, Saurabh Choudhary, Jayesh Rane, 2024-12-05. The academic book publishing sector has a key function when it comes to knowledge production and dissemination across various disciplines. For researchers, scholars, and educators, the process of moving from concept to publication is rarely a trivial task and often involves the use of imagination, perseverance, and teamwork. Publishing a monograph, an edited volume, or a textbook, or turning your thesis into a book can be painful. This book will help you demystify the world of academic book publishing, offering authors a guide to navigating the complicated process with success. This guide aims to provide authors with the knowledge of tools and resources needed to publish a book that reflects their research. If you want a sneak peek into the workings of scholarly publishing, it features advice from senior authors, publishers, and academics with an intimate familiarity with the academic publishing process. Divided into chapters, the book covers the major elements of the publishing journey, steps to writing the proposal, advice on working with publishers, and challenges of the current moment like open access and new fields of study. The first step to getting published is learning to write a scholarly manuscript or book proposal. Writers need to know how to present their research in front of potential publishers. It necessitates not just a firm grasp on the work in question but a facility for conveying the relevance of the work and its potential to make a difference. Therefore, it is very important to tread carefully through the relationship with the publishers as the success of publishing partnerships relies heavily on trust, collaboration, and shared vision for the book. Open access publishing for scientific journals has played an increasingly important role in the ever-evolving academic world. There are new ways for authors to disseminate their work and increase the accessibility of research through open access. It is an exciting time to be an author, but it is also a challenging time in terms of financial viability and finding new publishing models. This section deeply studies the influence of open access so that authors can better develop books around it. Many students work years on their theses and getting them published can greatly aid their academic careers. It is not simply editing; this means changing the format to suit for wider academic publication and conforming to the expectations of the publisher. This book is a road map for authors making this transition. For authors in emerging or interdisciplinary fields, publishing can bring

unique challenges There may not be established publishing pathways in these fields or the intended audience may be smaller and more specialized Despite these challenges there are great rewards to publishing in such fields and this book outlines strategies to achieve their success Authors will discover how to seek the ideal publisher determine their target market and how to frame their work to have a noteworthy effect in their area Technological advancements global trends and academic expectations have all combined to shape the future of academic book publishing By the end of this book readers will be equipped with a fundamental understanding of the academic publishing process From preparing manuscripts and working with publishers to navigating new models of publishing this guide arms authors with practical advice and strategies to ensure their research becomes a published book It is our goal that this book helps those who hope to disseminate their research through publication of scholarly books [Korean Studies](#) ,2005 [Indie Author Magazine](#) [Featuring Jillian Dodd](#) Alice
