

TRAUMA HEALING 2025 ADVANCED EQUIPPING SESSION

ABOUT THE SESSION

This session, the second of two seminars, continues the equipping process for facilitators in Bible-based Trauma Healing using the book *Healing the Wounds of Trauma: How the Church Can Help* and its associated programme model.

This proven approach uses applied Scripture and some of the best mental health principles to address spiritual and emotional wounds caused by trauma of war, ethnic conflicts, natural disasters, car accidents, abuse, and similar events. The book has been translated and taught in over 100 countries with more than 194 language groups in Africa, Asia, the Pacific, and the Americas.

LEARNING OBJECTIVES

This advanced session hones the skills acquired at the initial session and during the practicum.

By the end of this session:

Trainees should be better able to solve programme issues arising in trauma healing as they carry out their ministries. They should also be able to understand the materials completely and clearly, and teach them in a participatory way. Participants who have the necessary competencies will be certified as training facilitators or healing group facilitators at the end of the advanced session.

WHO SHOULD ATTEND?

Participants must have already attended an initial equipping session and co-led or led at least two healing groups (or equivalent activities) and submitted their reports.

Cognitive Behavioral Therapy for Insomnia in the Context of Comorbid Mental Health Conditions Andrea Goldstein-Piekarski, Rachel Manber, 2026-01-06
An estimated 6% to 10% of the U.S. population meets the criteria for insomnia disorder, a figure that is even higher among individuals experiencing psychiatric conditions. Evidence suggests that although experiencing sleep difficulties is a diagnostic criterion in several psychiatric conditions and is experienced in the context of some medical disorders, insomnia is a distinct disorder intricately interwoven with co-occurring medical and psychiatric conditions. This insightful new book explores Cognitive Behavioral Therapy for Insomnia (CBT-I) in a manner relevant to patients seen by mental health clinicians. CBT-I is an effective nonpharmacological treatment approach grounded in the sciences of sleep and behavior change. The volume's distinguished contributors carefully consider the components of CBT-I and provide guidance on customizing treatment for patients with and without co-occurring psychiatric conditions. After an initial review of the etiology, pathophysiology, and diagnostic features of insomnia, the authors explore a range of topics, including the following: Evidence supporting the efficacy of CBT-I and its components; Pharmacological approaches and strategies for tapering patients off hypnotic medications while they undergo CBT-I; Applying CBT-I in the context of specific psychiatric disorders such as ADHD, depression, schizophrenia, bipolar disorder, and substance use; Adapting CBT-I for unique patient populations, including adolescents, pregnant patients, and older adults; Cultural considerations for treating insomnia in Black, Hispanic, and Asian patients. Case examples, detailed tables, and key points illustrate the application of CBT-I principles. Insomnia is not only debilitating and life-altering for those affected; it also carries significant economic and public health consequences. *Cognitive Behavioral Therapy for Insomnia in the Context of Comorbid Mental Health Conditions* provides clinicians with the knowledge and tools to offer meaningful relief to their patients.
