The prescription of psychotropic drugs, suicidality, loneliness, and depression. The fully revised and expanded second edition brings together 76 authors from 19 countries and 5 continents who collectively share their experiences in the clinical application of positive mental health across more than 55 chapters. Twenty-two new chapters have been added, addressing emerging topics and contemporary issues. These include insights into practicing psychotherapy in Ukraine and Ethiopia, countries deeply affected by wars; multiple chapters dedicated to trauma; the Chinese perspective on navigating the Covid-19 pandemic and its effects; understanding the LGBTQ community; the experience of online therapy since the outbreak of the Covid-19 pandemic; and exploration of disorders such as autism, chronic pain, death, and grieving, and suicide. All authors are practicing psychotherapists in their respective countries, providing firsthand accounts from their daily experiences. As we move into the third millennium, the field of mental health is in an exciting position to bring together diverse ideas from a range of disciplines that illuminate our understanding of human experience, neurobiology, developmental psychology, traumatology, and systems theory.
