Aging and Loss Jason Danely, 2015-01-02 By 2030 over 30% of the Japanese population will be 65 or older foreshadowing the demographic changes occurring elsewhere in Asia and around the world What can we learn from a study of the aging population of Japan and how can these findings inform a path forward for the elderly their families and for policy makers Based on nearly a decade of research *Aging and Loss* examines how the landscape of aging is felt understood and embodied by older adults themselves In detailed portraits anthropologist Jason Danely delves into the everyday lives of older Japanese adults as they construct narratives through acts of reminiscence social engagement and ritual practice and reveals the pervasive cultural aesthetic of loss and of being a burden Through first hand accounts of rituals in homes cemeteries and religious centers Danely argues that what he calls the self in suspense can lead to the emergence of creative participation in an economy of care In everyday rituals for the spirits older adults exercise agency and reinterpret concerns of social abandonment within a meaningful cultural narrative and by reimagining themselves and their place in the family through these rituals older adults in Japan challenge popular attitudes about eldercare Danely's discussion of health and long term care policy and community welfare organizations reveal a complex picture of Japan's aging society
