Older Adults In Psychotherapy:

Psychotherapy with Older Adults Bob G. Knight, 2004-02-20 This Third Edition of the bestselling Psychotherapy with Older Adults continues to offer students and professionals a thorough overview of psychotherapy with older adults. Using the contextual cohort based maturity specific challenge CCMSC model it draws upon findings from scientific gerontology and life span developmental psychology to describe how psychotherapy needs to be adapted for work with older adults as well as when it is similar to therapeutic work with younger adults. Sensitively linking both research and experience author Bob G Knight provides a practical account of the knowledge technique and skills necessary to work with older adults in a therapeutic relationship. This volume considers the essentials of gerontology as well as the nature of therapy in depth focusing on special content areas and common themes. Psychotherapy with Older Adults includes a comprehensive discussion of assessment and options for intervention. Numerous case examples illustrate the dynamics of the therapeutic task and issues covered in therapy and stress the human element in working with older adults. A concluding chapter considers ethical questions and the future of psychotherapy with older adults. The author has updated the Third Edition to reflect new research findings and has written two entirely new chapters covering psychotherapy with persons with dementia and psychotherapy with caregivers of frail older adults. Since its initial publication in 1986 the book has been used as a course text and a professional reference around the world including translations into French Dutch Chinese and Japanese. It is a vital resource for practicing therapists and counselors who work with older adults and is also ideally suited as a text for advanced students in psychology social work gerontology and nursing. Praise for Previous Editions Bob G Knight's largest contribution is his excellent discussion of therapy. The book is clearly written with a good use of summaries and case examples to clarify the major points. By linking research findings to practice experience Knight has provided a pragmatic introduction which should be helpful to psychiatrists psychologists social workers and psychiatric nurses working with older adults. JOURNAL OF APPLIED GERONTOLOGY I recommend this book to anyone interested in working with the elderly partly because of the content and partly because the author presents the case for doing psychotherapy with the elderly with realism and enthusiasm.

BEHAVIOR RESEARCH THERAPY Counselling Older Adults Bernard Kingston, Eleanor O'Leary, 1996
Presents an approach derived from the author's use of gestalt therapy *Counseling Older Adults* John Blando, 2014-04-08
Counseling Older Adults provides an introduction to gerontological counseling covering theories of aging and their practical application in counseling work with older adults **Older Adults in Psychotherapy** Bob Knight, 1992-01-09 What is it like to counsel the older client. What issues are most often addressed. What mistakes pitfalls and oversights can be made in counseling the older client. And which counseling techniques work best with older adults. Reassuring to both new and experienced practitioners and students. Older Adults in Psychotherapy reaffirms what working with the older client is all about. Older Adults in Psychotherapy vividly presents 20 case histories of older people in psychotherapy. Written to stand

alone or in conjunction with Bob Knight's successful volume *Psychotherapy with Older Adults* this volume covers many important issues including depression grieving preparation for death caregiving issues anxiety sexuality and long term mental disorders. In each chapter the case presentation is followed by an explication of the content themes as well as a specific discussion on rapport building treatment techniques used in the case gerontological issues and transference issues. Also introduced is a maturity specific challenge model for thinking about therapy with the elderly. Through the insightful presentation of case histories Knight helps practitioners and students in gerontology social work psychiatry psychology nursing and health care become more sensitive to the needs of older clients and more effective in their treatment techniques. The book makes an important contribution to the field. It will be useful to therapists in training from a variety of disciplines for example social workers psychologists psychiatrists and geriatric nurse practitioners to faculty members involved in training new professionals in these disciplines and to current practitioners in the fields of psychiatry psychology social work and nursing who want to extend and expand their expertise in aging. All of these audiences will find the material very useful very accessible with clear implications for their day to day practice. This is a very important book on a timely and important topic. Michael A. Smyer, The Pennsylvania State University. The case histories vividly demonstrate the mix of medical social and psychological problems and that in itself will make a strong contribution to the field. Practitioners at all levels can learn something both from what Knight does and doesn't do in his case histories. It should be a particularly illuminating experience for beginning therapists. Ruth Campbell, The University of Michigan Medical Center, Ann Arbor. *Older Adults in Psychotherapy* definitely makes a distinct contribution in the field. Real full bodied cases about elderly people are hard to find. I would buy the book and inform colleagues about it and I would use it as a text in classes such as *Counseling Older Adults*. There is an impressive willingness on Dr. Knight's part to describe his own feelings, failings, oversights, etc. He comes through as emotionally accessible and believable as a therapist. It would be wonderful for students in training to read such accounts and for those of us long graduated to be reassured that others also deal with these issues. Sandra M. Powers, The University of North Carolina at Greensboro. Throughout the book Knight adopts a very honest and personal style and he is not afraid to include his feelings or the shortcomings in his work. His open rejection of a loss deficit model of ageing in favour of one emphasizing growth toward maturity is refreshing, optimistic and in my experience more accurate. Certainly this is a book that will resonate with those familiar with this population as well as being a useful source of inspiration for those new in this area. Clinical Psychology Forum. **Handbook of Counseling and Psychotherapy with Older Adults** Michael Duffy, 1999-07-15. With the graying of society therapists are seeing more and more older clients. In this book editor Michael Duffy brings together leading experts to explain the unique problems of older adults and describe effective treatment techniques. **A Guide to Psychotherapy and Aging** Bob Knight, Steven H. Zarit, 1996. Includes an English translation of the report on world regional and national economic conditions submitted to the Romanian Parliament with a summary of the

[Psychological Therapies with Older People](#) Jason Hepple, Jane Pearce, Philip Wilkinson, 2014-05-22 Sigmund Freud believed that psychoanalysis and other forms of therapy was not suitable for people over 50 years of age In Psychological Therapies with Older People the authors demonstrate the value of a range of

psychological interventions with older people showing that it is not too late to help. With an emphasis on practical application and using a wide range of clinical examples the authors describe the therapies most likely to be useful in a mental health service for older people and consider the implications for service provision. Therapies covered include interpersonal therapy, IPT, cognitive behavioural therapy, CBT, psychodynamic and systemic therapy, cognitive analytical therapy, CAT. For each treatment the historical background and basic theoretical model is summarised before giving a description of the therapy in practice. The authors also discuss the theory of the use of evidence of efficacy and effectiveness in choosing therapeutic interventions summarising currently available data. *Psychological Therapies with Older People* will be an invaluable resource for psychiatrists and psychologists working with older people as well as to GPs, nurses and occupational therapists. **Older adults in psychotherapy** Bob G.
