Architectural Publications Index ,2003 [Building Transatlantic Italy](#) Paolo Scrivano,2017-05-15 At the end of the Second World War America s newly acquired status of hegemonic power together with the launch of ambitious international programs such as the Marshall Plan significantly altered existing transatlantic relations In this context Italian and American architectural cultures developed a fragile dialogue characterized by successful exchanges and forms of

collaboration but also by reciprocal wariness The dissemination of models and ideas concerning architecture generated complex effects and frequently led to surprising misinterpretations obstinate forms of resistance and long negotiations between the involved parties Issues of continuity and discontinuity dominated Italian culture and society at the time since at stake was the possible balance between allegedly long established traditions and the prospect of a radical rupture with recent history Architectural culture often contributed to reach a compromise between very diverging attitudes Situated in the larger realm of studies on Americanization this book questions current interpretations of transatlantic relations in architecture By reconsidering the means and effects of the dialogue that unfolded between the two sides of the Atlantic during the postwar years the volume analyzes how cultural and formal models were developed in one context and then modified when transferred to a new one as well as the fortune of this cultural exchange in terms of circulation amplification and simplification
