Olympic Sacrifice:

Throughout Your Generations Forever Nancy Jay, 1992-07 Why does sacrifice more than any other major religious institution depend on gender dichotomy Why do so many societies oppose sacrifice to childbirth and why are childbearing women so commonly excluded from sacrificial practices In this feminist study of relations between sacrifice gender and social organization Nancy Jay reveals sacrifice as a remedy for having been born of woman and hence uniquely suited to establishing certain and enduring paternity Drawing on examples of ancient and modern societies Jay synthesizes sociology of religion ethnography biblical scholarship church history and classics to argue that sacrifice legitimates and maintains patriarchal structures that transcend men's dependence on women's reproductive powers **Exploring Biblical Kinship**

Joan C. Campbell, Dr. Patrick Hartin, 2023-07-19 Exploring Biblical Kinship honors John J Pilch a long time member of the Catholic Biblical Association and a founding member of the Context Group The festschrift generated by the Social Science Taskforce of the CBA explores biological and fictive kinship issues reflected in the lives of biblical persons The essays in Part One deal with how patronage operates in biblical culture Part Two analyzes family dynamics commencing with an essay on violence contributed by the honoree Part Three delves into kinship descent and discipleship The text reflects the enduring influence of a renowned social science scholar *New Approaches to the Temple of Zeus at Olympia* András

Patay-Horváth, 2015-09-04 This volume brings together the proceedings of an international and interdisciplinary symposium held at Budapest between 8th and 10th May 2014 It was the first event dealing exclusively with the temple of Zeus at Olympia which was at the time of its construction the largest temple in mainland Greece and which has remained the largest ancient building of the Peloponnese ever since Contributors come from eight countries namely Austria France Germany Greece Hungary Italy Japan and the UK and from several different fields of classical studies including archaeology ancient history numismatics epigraphy and architecture The contributions deal with widely different aspects of the building and its sculptural decoration including masons marks metrology the usage of different marbles and depictions of invisible gods and approach these issues from new and unique perspectives Some papers focus on the cult of Zeus or on inscriptions found in or on coins associated with the sanctuary others describe how later authors might have used the monument or bridge the gap between classical studies and the latest digital technologies applied to archaeology and cultural heritage As such all of the essays gathered here will inspire classical scholars to make use of these new research paths *History of Greece, From the Earliest Times to the End of the Persian War* Max Duncker, 2025-07-29 Reprint of the original first published in 1883 The

Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage **The Program and Schedule of the Ancient Olympic Games** Hugh M. Lee, 2001 **Religious Speciation** Ina Wunn, Davina Grojnowski, 2019-02-07

This book presents a consecutive story on the evolution of religions It starts with an analysis of evolution in biology and ends

with a discussion of what a proper theory of religious evolution should look like It discusses such questions as whether it is humankind or religion that evolves how religions evolve and what adaptation of religions means Topics examined include inheritance and heredity religio speciation hybridization ontogenetics and epigenetics phylogenetics and systematics Calling attention to unsolved problems and relating the evolutionary subject matter to appropriate material the book integrates and interprets existing data Based on the belief that an unequivocal stand is more likely to produce constructive criticism than evasion of an issue the book chooses that interpretation of a controversial matter which seems most consistent with the emerging picture of the evolutionary process Nothing in biology makes sense except in the light of evolution the evolutionary biologist and co founder of the so called New Synthesis in Evolutionary Biology Theodosius Dobzhansky 1900 1975 wrote in his famous essay of 1973 opposing creationism in American society Today Dobzhansky s statement is not only fully accepted in biology but has become the scientific paradigm in disciplines such as psychology archaeology and the study of religions Yet in spite of this growing interest in evolutionary processes in religion and culture the term evolution and the capability of an evolutionary account have to date still not been properly understood by scholars of the Humanities This book closes that gap
