Sporting Modernity Joann M. Skrypzak, 2008-10 During the turbulent years of the Weimar Republic 1918-1933 sports emerged as a popular phenomenon that critics often derided as a degenerate fad But sports and art institutions as well as avant garde artists looked more closely at sports potential to rejuvenate a populace demoralized by World War I and cultivate a more dynamic harmonious society This book examines images of sports in the visual arts of Weimar Germany to explore how institutions and artists forged a link between sports and art and gave new visual form to notions about the ideal body It looks at the 1930 Berlin art exhibition Sports as Cultural Factor and sports at the Bauhaus and investigates the sports pictures of László Moholy-Nagy Anton Räderscheidt and Willi Baumeister as exemplary case studies Besides examining Weimar sports culture and its link to art this study illuminates the complex ways in which artists used the motif of the athletic body to define humans relation to modernity while addressing issues of industrialization gender mind/body dualism and the promotion of sports This engaging work will be of particular value to readers interested in

Duiker, Spielvogel, 2004-07

Constructing the Invisible Landscape Jeremy Scott White, 2005

The Summer Olympic Games of 1932 is not an architectural story in the narrow sense of the term. If architecture is broadly defined as landscape and the process by which it is shaped, invested with meaning and packaged, then the organizing effort is a very architectural story. Indeed, Booster brought the Games to Los Angeles as a surrogate world's fair. The Organizing Committee that select group of boosters enthusiastically supported by local publishers sought the opportunity to host the Olympics for the purpose of promoting the city. They endeavoured to manipulate the landscape as a means of making the Olympics a showcase but manipulate here means not so much the building and rebuilding of material form, constructing streets and buildings; it also means the construction of experience by a variety of material and ephemeral means. Even before the athletes arrived, the booster's project was the creation and projection of a holistic image of landscape they called it Arcadia, a landscape without internal contradictions and organically suited to the ideals of Olympism and the mythic ideals boosters had recanted for fifty years. They accomplished this largely by suppressing or making invisible aspects of the landscape and attendant social relations that contradicted the booster's narrative. This dissertation treats the Olympic event as a synthesis of motives and strategies, an urban episode in which local boosters inflected and re-interpreted the Olympic scheme. In a larger context, this study questions the importance bestowed upon visible and monumental buildings in the study of modern architecture and urban planning.

Bodies in Motion Catherine Gullo Bellver, 2010

This book examines Spanish avant garde poetry within the context of the culture of the twenties that promoted physical movement and values of change, youthfulness and freedom. Dance, sports and the machine are singled out because they clearly set the body in motion and helped create a radically new outlook on life.

The Unapologetic Athlete Julia Kathleen Kehew, 2009

Participation in international sporting events has social and cultural meanings beyond the athletic performances produced. Throughout the twentieth century, marginalized groups such as African Americans, women and people with disabilities have used athletic participation as a way to shape their public images and show positive representations in hopes of changing public perceptions. For these groups, athletic participation has drawn on an assimilationist model that seemed to suggest that marginalized individuals could succeed if only they tried hard enough. In the early 1980s, organizers created the Gay Games, which rejected the assimilationist model adopted by earlier groups to present a visible alternative to mainstream stereotypes about gay men and lesbians. Gay Games organizers hoped to provide an event that would unite the gay and lesbian population while educating mainstream viewers by providing positive representations to counter prevailing negative imagery. While the first Gay Games succeeded in this goal, the AIDS epidemic prompted a wave of negative representations, particularly of gay men that were difficult to overcome. Instead, Gay Games organizers offered representations of gay men and women engaged in healthy, wholesome athletic activity as a way of countering images of a disease-riddled population. The response by the gay and lesbian population to the AIDS

epidemic also affected mainstream responses since the creation of an AIDS industry arising from grass roots AIDS Service Organizations ultimately drew lucrative government grants for healthcare and research attracting the attention of corporate advertisers who recognized the gay and lesbian population as a potential niche market Corporate advertisements in gay and lesbian publications and corporate sponsorship of the Gay Games led Gay Games organizers to adopt the same assimilationist model that other marginalized groups had utilized Increasingly their message indicated that gay men and lesbians could succeed if only they tried hard enough a narrative that ignored institutional inequities This study of the Gay Games in comparative perspective to other marginalized groups and their participation in international sporting events is important because it traces the way that a radical social movement became increasingly normalized in mainstream representations once the group in question demonstrated their viability as consumer market This suggests that the economics of consumption rather than equality and fairness are the driving forces behind this normalization process *The Greenwood Encyclopedia of World Popular Culture* Gary Hoppenstand,2007 An encyclopedia describes all aspects of world culture broken down into six regional categories discussing the art dance fashion food pastimes periodicals recreation and transportation of each region

France from 1851 to the Present Roger Célestin,Eliane Françoise DalMolin,2007-08-15 A cultural history of France from a period of dominance in the mid 19th century to one of decline or crisis in the first few years of the third millennium The first part 1851 to 1944 explores developments ranging from the transformation of Paris and the appearance of the colonial empire to the construction of modern French society The second part of the book follows the crisis of French universalism or of the French exception from the end of World War II to the contemporary period in which the French model has been increasingly difficult to sustain in the face of globalization the Americanization of culture decolonization and multiculturalism among other developments *The Olympic Games* W.
