On All Frontiers:

On All Frontiers Christina Bates, Dianne Dodd, Nicole Rousseau, 2005-04-30 Nursing has a long and varied history in Canada. Since the founding of the first hospital by the Augustine nuns in 1637, nurses have contributed greatly to Canadians' quality of life. On All Frontiers is a comprehensive history of Canadian nursing. Editors Christina Bates, Dianne Dodd, and Nicole Rousseau have brought together a vast body of research into one volume. Authored by leading experts, the chapters and vignettes form an overview of the history of Canadian nursing to date. From the midwives of early Canada to urban public health nurses from remote outposts to the battlefields of Europe, On All Frontiers documents the hardships, challenges, and achievements of Canadian nurses. Richly illustrated with archival photographs, it is an essential read for scholars of Canadian health care history. Published in English.

The American Frontier Kenneth E. Lewis, 2014-05-19 The American Frontier: An Archaeological Study of Settlement Pattern and Process focuses on general rules or laws for the evolution of all agrarian frontiers, emphasizing those that are expanding. A variety of frontiers is also discussed in addition to the agrarian type to pinpoint similarities and differences. Organized into 11 chapters, this book first elucidates the processes of frontier colonization and then describes the frontier model employed for the interpretation of documentary and material evidence for the examination of the development of South Carolina frontier. Some chapters then focus on the examination of South Carolina's colonial past in terms of the model to determine its degree of conformity with the latter and to set the stage for the archaeological study. The development of archaeological hypotheses and a consideration of the material record. Other types of frontiers are characterized by separate developmental processes, and several of these are discussed in Chapter 10 as avenues for further research. This book will be valuable to scholars in several fields, including history, geography, and anthropology. Historical archaeologists will find it especially useful in designing research in former colonial areas and in modeling additional kinds of frontier change.
