On Listening Angus Carlyle, Cathy Lane, 2013 *On Listening* is a unique collection of forty multi disciplinary perspectives drawn from anthropology bioacoustics geography literature community activism sociology religion philosophy art history conflict mediation and the sonic arts including music ethnomusicology and field recording These specially commissioned contributions explore the many ways in which skilled listening can mediate new relationships with our physical environment and the people and other species that we share it with From the Introduction Listening has become an increasingly popular subject of study It features in conferences in academic journals in doctoral research projects However reflexive listening is an applied practice that exceeds the boundaries of academic institutions to take its place in a number of everyday settings This book aims to connect the scholarly and the experiential and extend the contemporary discourse on listening

Perspectives on Listening Andrew D. Wolvin, Carolyn Gwynn Coakley, 1993-07 This book provides listening researchers educators and practitioners with an analysis of listening behavior from current perspectives developed by scholars concerned with the way humans process oral messages The chapters offer a useful base for applying what the authors know about the complexities of listening to improving listening skills in personal relationships academic work and social settings Contributors from communication education psychology reading audiology and learning skills fields offer their perspectives on how we can understand listening extending our present theoretical base into exciting new dimensions Late Night Thoughts on Listening to Mahler's Ninth Symphony Lewis Thomas, 1995-05-01 This magnificent collection of essays by scientist and National Book Award winning writer Lewis Thomas remains startlingly relevant for today's world Luminous witty and provocative the essays address such topics as The Attic of the Brain Falsity and Failure Altruism and the effects the federal government's virtual abandonment of support for basic scientific research will have on medicine and science Profoundly and powerfully Thomas questions the folly of nuclear weaponry showing that the brainpower and money spent on this endeavor are needed much more urgently for the basic science we have abandoned and that even medicine's most advanced procedures would be useless or insufficient in the face of the smallest nuclear detonation And in the title essay he addresses himself with terrifying poignancy to the question of what it is like to be young in the nuclear age If Wordsworth had gone to medical school he might have produced something very like the essays of Lewis Thomas TIME No one better exemplifies what modern medicine can be than Lewis Thomas The New York Times Book Review On Listening as a Form of Care João Guilherme Biehl, Kristen Rogheh Ghodsee, Lisa Stevenson, Aaron Levy, 2020 Combining first person narration philosophical reflections and advocacy this volume features conversations with anthropologists and ethnographers Lisa Stevenson João Biehl and Kristen Ghodsee and offers a toolkit of strategies for listening as a form of care The contributors teach us to foreground the lives of ordinary people within a rapidly changing political and institutional landscape and afford us opportunities to explore and reimagine health in relation to frameworks such as political economy medicalization human
