On Reincarnation:

Five Lectures on Reincarnation Swami Abhedananda, 2022-09-16 In *Five Lectures on Reincarnation* Swami Abhedananda explores the profound philosophical and spiritual implications of reincarnation through a series of engaging lectures. Written in the late 19th century, this text exemplifies Abhedananda's eloquent and accessible literary style, drawing on both Eastern and Western thought. The work situates reincarnation within broader discussions of consciousness, identity, and the eternal soul, serving as a bridge between various intellectual traditions. Abhedananda meticulously parses scientific, metaphysical, and spiritual perspectives, making compelling arguments for the reality of reincarnation as a mechanism for soul growth and evolution. Swami Abhedananda was a prominent disciple of the renowned mystic Ramakrishna and an influential figure in the spread of Vedanta philosophy in the West. His extensive travels and experiences studying various spiritual traditions undoubtedly informed his insights on reincarnation. Abhedananda's lifelong commitment to uplifting humanity through spiritual knowledge captures the zeitgeist of the early 20th century, an era marked by a burgeoning interest in Eastern spirituality among Western audiences. This book is highly recommended for readers interested in metaphysics, spirituality, and comparative religion. Abhedananda's lucid presentation makes this complex subject accessible, inviting contemplation on the nature of life, death, and the soul's journey through multiple lifetimes. His scholarly yet approachable style ensures that both novices and seasoned scholars will find profound meaning in his teachings.

Abraham lived once Isaac lived once Jacob lived once You shall live once I who am God took on flesh once and will not take it on a second time for God too respects order And the order of human life is this For a spirit to be fused to flesh to make man like God who is not flesh but spirit not animal but supernatural For the flesh when it declines in its evening to fall like a slough and covering into the nothingness from which it was taken and the spirit to return to its life Blessed if it lived Damned if it perished for having made the flesh its lord instead of making God the lord of its spirit For that spirit from the hereafter whose details you uselessly wish to know without contenting yourselves with believing in its existence to wait with a fearful trembling or a joyful thrill to see the flesh rise again to clothe itself therein once again on Earth's last day and to plunge with it into the abyss or penetrate into Heaven also glorified in matter with which you have overcome because it has been your natural enemy changed into a supernatural ally by you But how could you take on one flesh at the time of my sublime review and go to condemnation or glory with it if each spirit had many fleshly existences And which would it choose from among them The first or the last And how could you invoke the blessed if they were already reincarnated And how could you call your deceased yours if at that moment they were already the children of others And life Oh life once over never returns You are given an hour of eternity a moment of eternity to conquer Eternity I give you time This is at once love and justice What would you say if I struck you at the first mistake You would say Why Lord If You had given me time to reflect I would have repented I leave you time You are at fault one two ten seventy times and I could strike you I give you time So that you cannot

Abhedananda,2004-10 The visible phenomena of the universe are bound by the universal law of cause and effect The effect is visible or perceptible while the cause is invisible or imperceptible The falling of an apple from a tree is the effect of a certain invisible force called gravitation Although the force cannot be perceived by the senses its expression is visible All perceptible phenomena are but the various expressions of different forces which act as invisible agents upon the subtle and imperceptible forms of matter These invisible agents or forces together with the imperceptible particles of matter make up the subtle states of the phenomenal universe When a subtle force becomes objectified it appears as a gross object Therefore we can say that every gross form is an expression of some subtle force acting upon the subtle particles of matter The minute particles of hydrogen and oxygen when combined by chemical force appear in the gross form of water Water can never be separated from hydrogen and oxygen which are its subtle component parts Its existence depends upon that of its component parts or in other words upon its subtle form If the subtle state changes the gross manifestation will also change The peculiarity in the gross form of a plant depends upon the peculiar nature of its subtle form the seed **Five Lectures on Reincarnation**

Matlock,2019-06-15 Signs of Reincarnation provides the first comprehensive look at the belief in reincarnation and the evidence for past lives from historical records anthropological studies and contemporary research Matlock discusses various ways the evidence may be interpreted and shows that although reincarnation entails a rejection of the materialist notion that consciousness is generated by the brain it does not require the acceptance of any radically new concepts or the abandonment of well established findings in mainstream psychology or biology This book offers students scholars and anyone interested in

the possibility of reincarnation an essential grounding in beliefs cases and theory while opening doors for future research into the extension of consciousness beyond our present lives

How We Remember Our Past Lives Curuppumullagē Jinarājadāsa,1923 *Five Lectures on Reincarnation* Swami Abhedananda,2020-03 Every voluntary or involuntary action of the body sense or mind must correspond to the dormant impressions stored up in the subtle body Although growth the process of nourishment and all the changes of the gross physical body take place according to the necessarily acting causes yet the whole series of actions and consequently every individual act the condition of the body which accomplishes it nay the whole process in and through which the body exists are nothing but the outward expressions of the latent impressions stored up in the subtle body Upon these rests the perfect suitableness of the animal or human body to the animal or human nature of one s impressions The organs of the senses must therefore completely correspond to the principal desires which are the strongest and most ready to manifest They are the visible expressions of these desires If there be no hunger or desire to eat teeth throat and bowels will be of no use If there be no desire for grasping and moving hands and leags will be useless Similarly it can be shown that the desire for seeing hearing etc has produced the eye ear etc If I have no desire to use my hand and if I do not use it at all within a few months it will wither away and die In India there are some religious fanatics who hold up their arms and do not use them at all after a few months their arms wither and become stiff and dead A person who lies on his back for six months loses the power of walking There are many such instances which prove the injurious effects of the disuse of our limbs and organs
